Designed and printed for young explorers everywhere.
Made with love in Australia.

THIS BOOK BELONGS TO:

ARTIST NAME

Get ready to color 50 dinosaur wonders!

TOP COLORING TIPS!

1. Put a Blank Sheet Behind Your Page
   When using juicy markers, place a scrap sheet behind your drawing to keep the next page perfectly clean!

2. Start Light, Then Go Dark
   Color lighter shades first, then layer darker tones on top for amazing depth and pop.

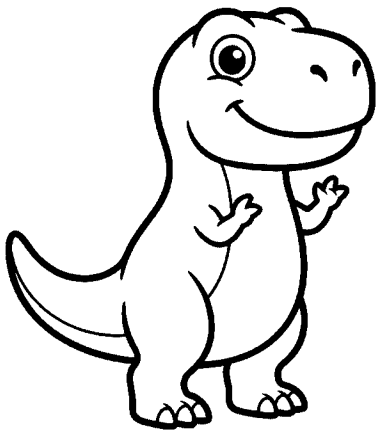

3. Mix Your Art Tools
   Try combining crayons, colored pencils, and markers together on the same dinosaur for fun textures.

4. There Are No Mistakes In Art!
   Make your dinosaurs any color you want. A purple T. rex or a rainbow Stegosaurus is awesome!

MY COLOR TEST PALETTE

Test your pencils, markers, and crayons here before coloring your dinosaurs!

MY EXPLORER PLEDGE:

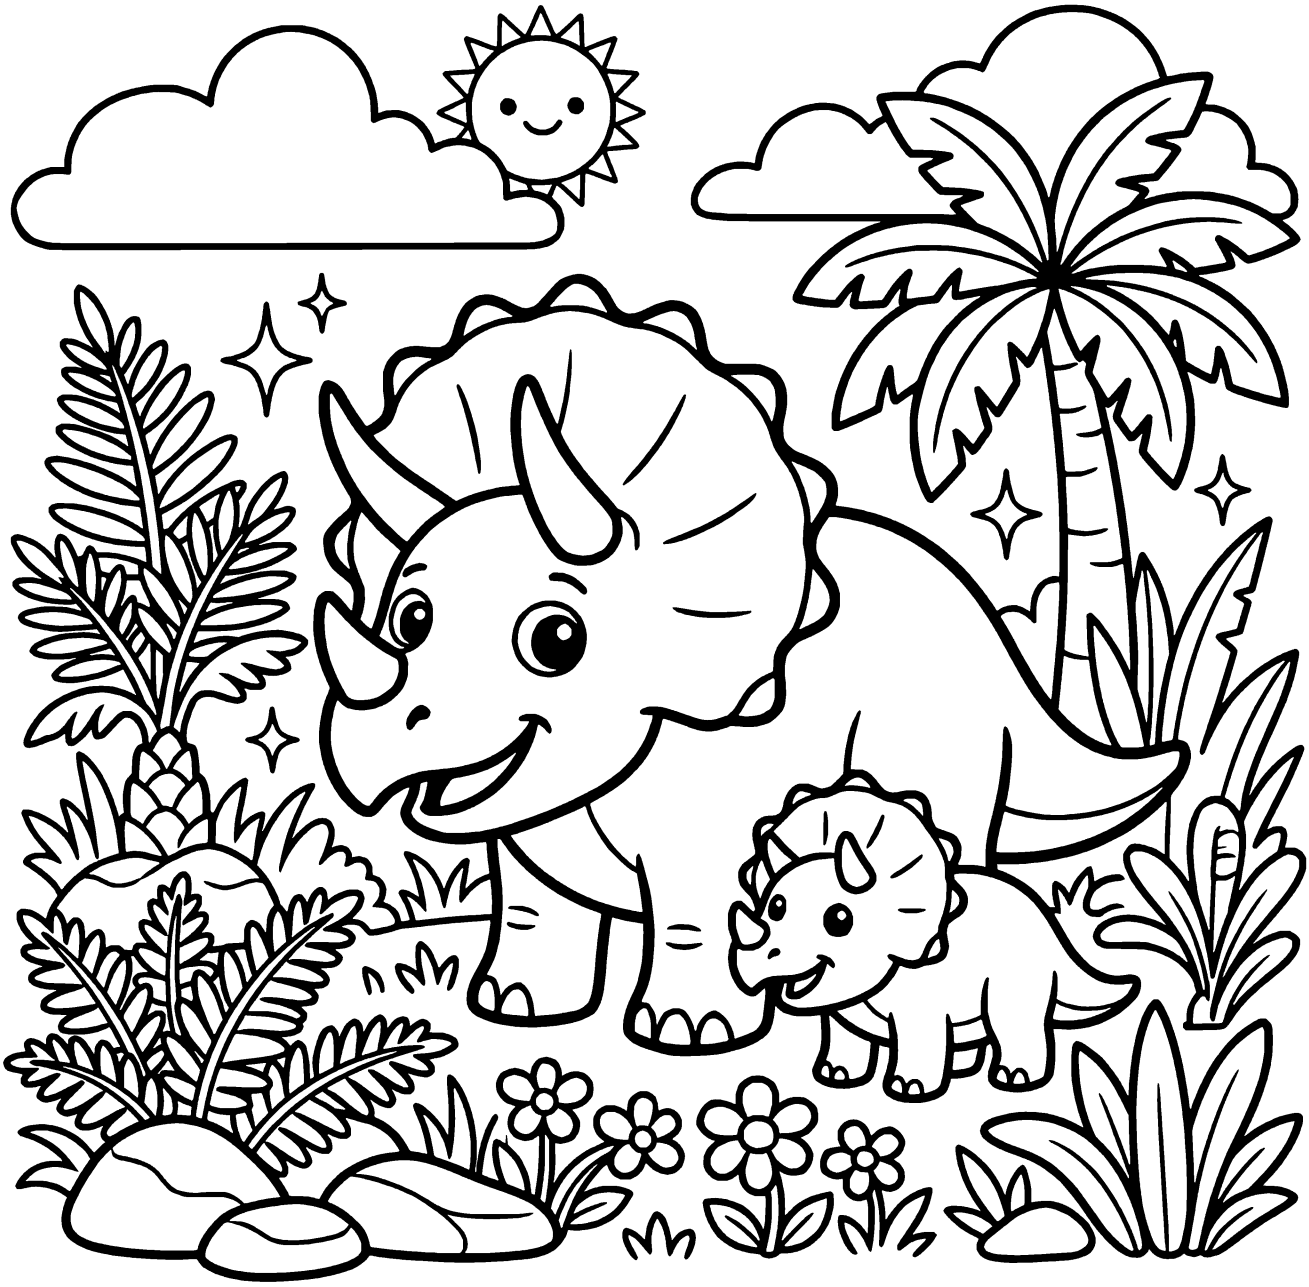

"I promise to have fun,
make this book my own,
and be proud of every
drawing I color!"

_____

ARTIST SIGNATURE

T. rex had tiny arms, but they were strong enough to lift about 400 pounds!

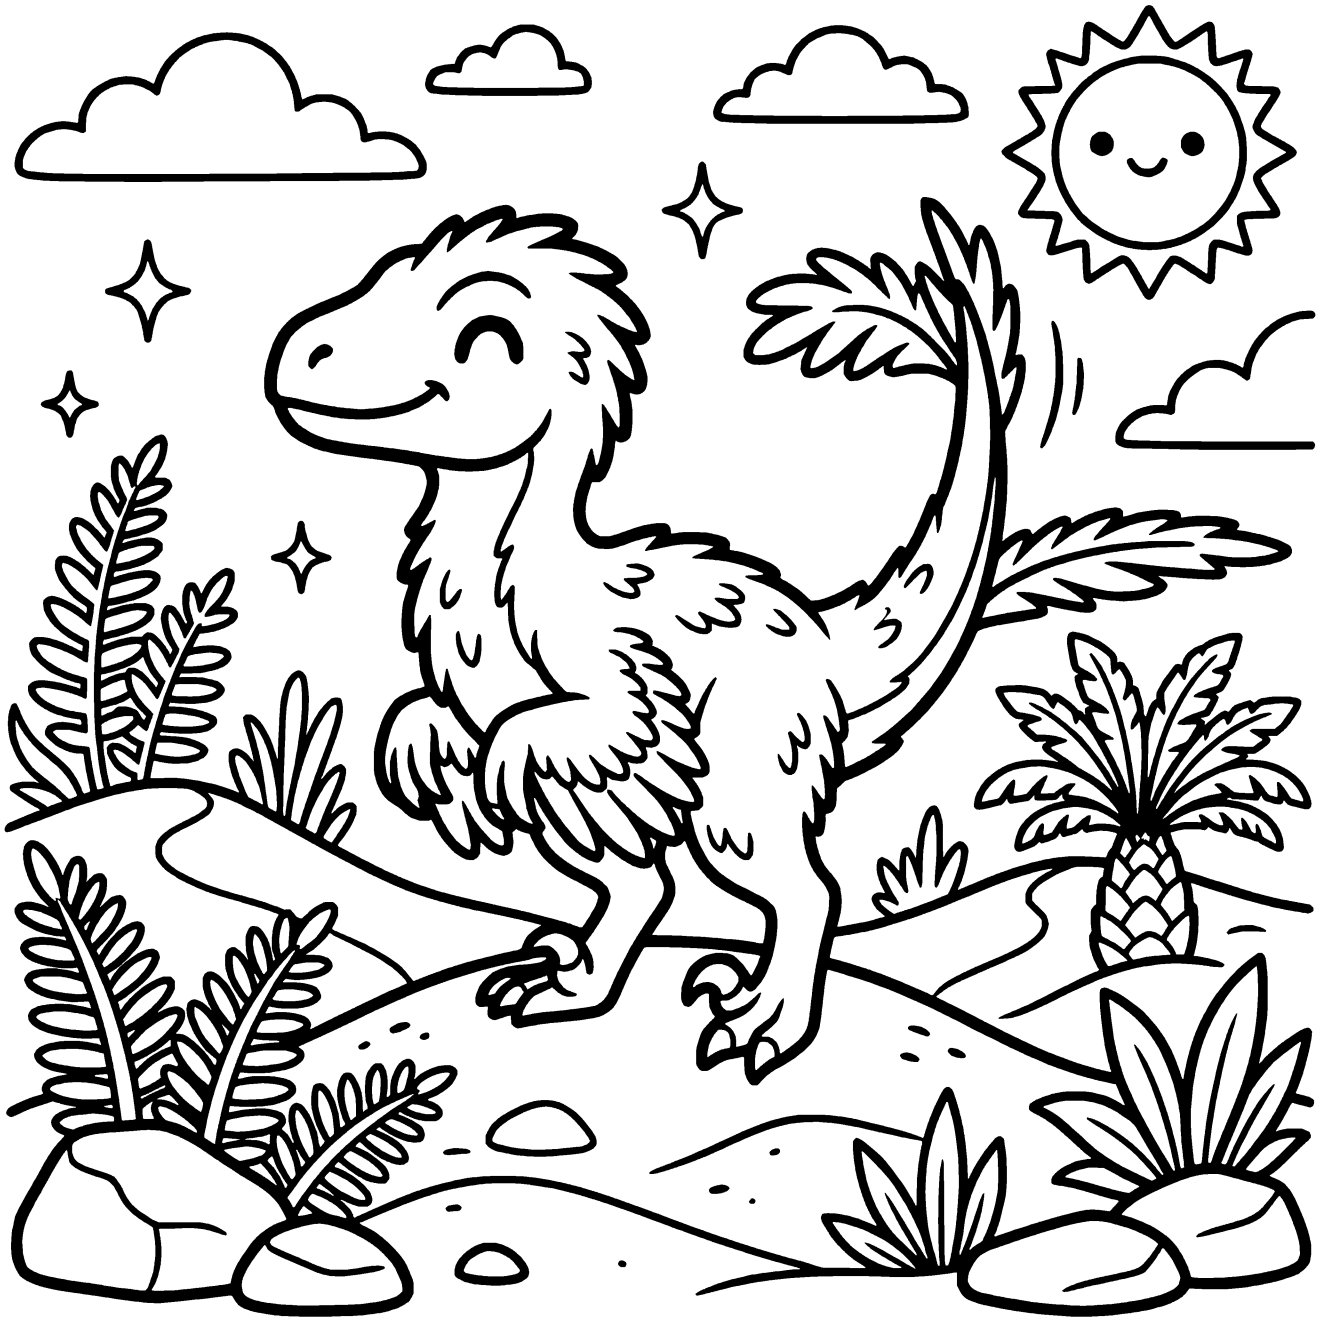

Triceratops means "three-horned face."

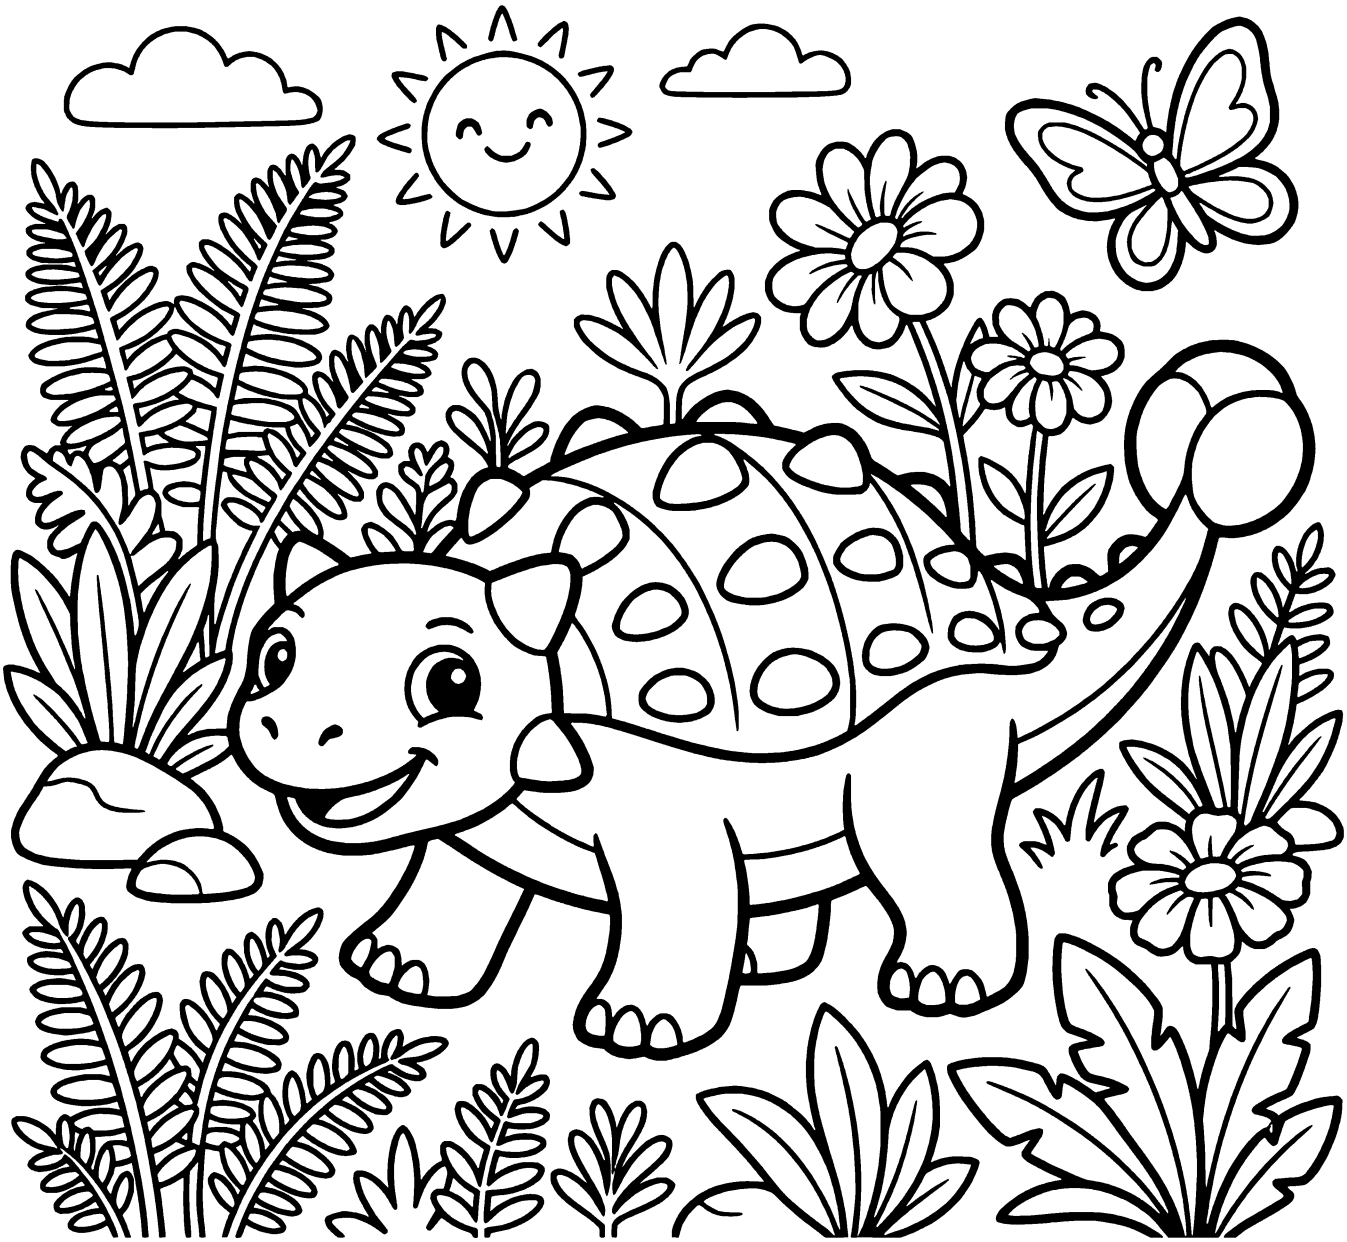

The spikes on a Stegosaurus tail are called a thagomizer.

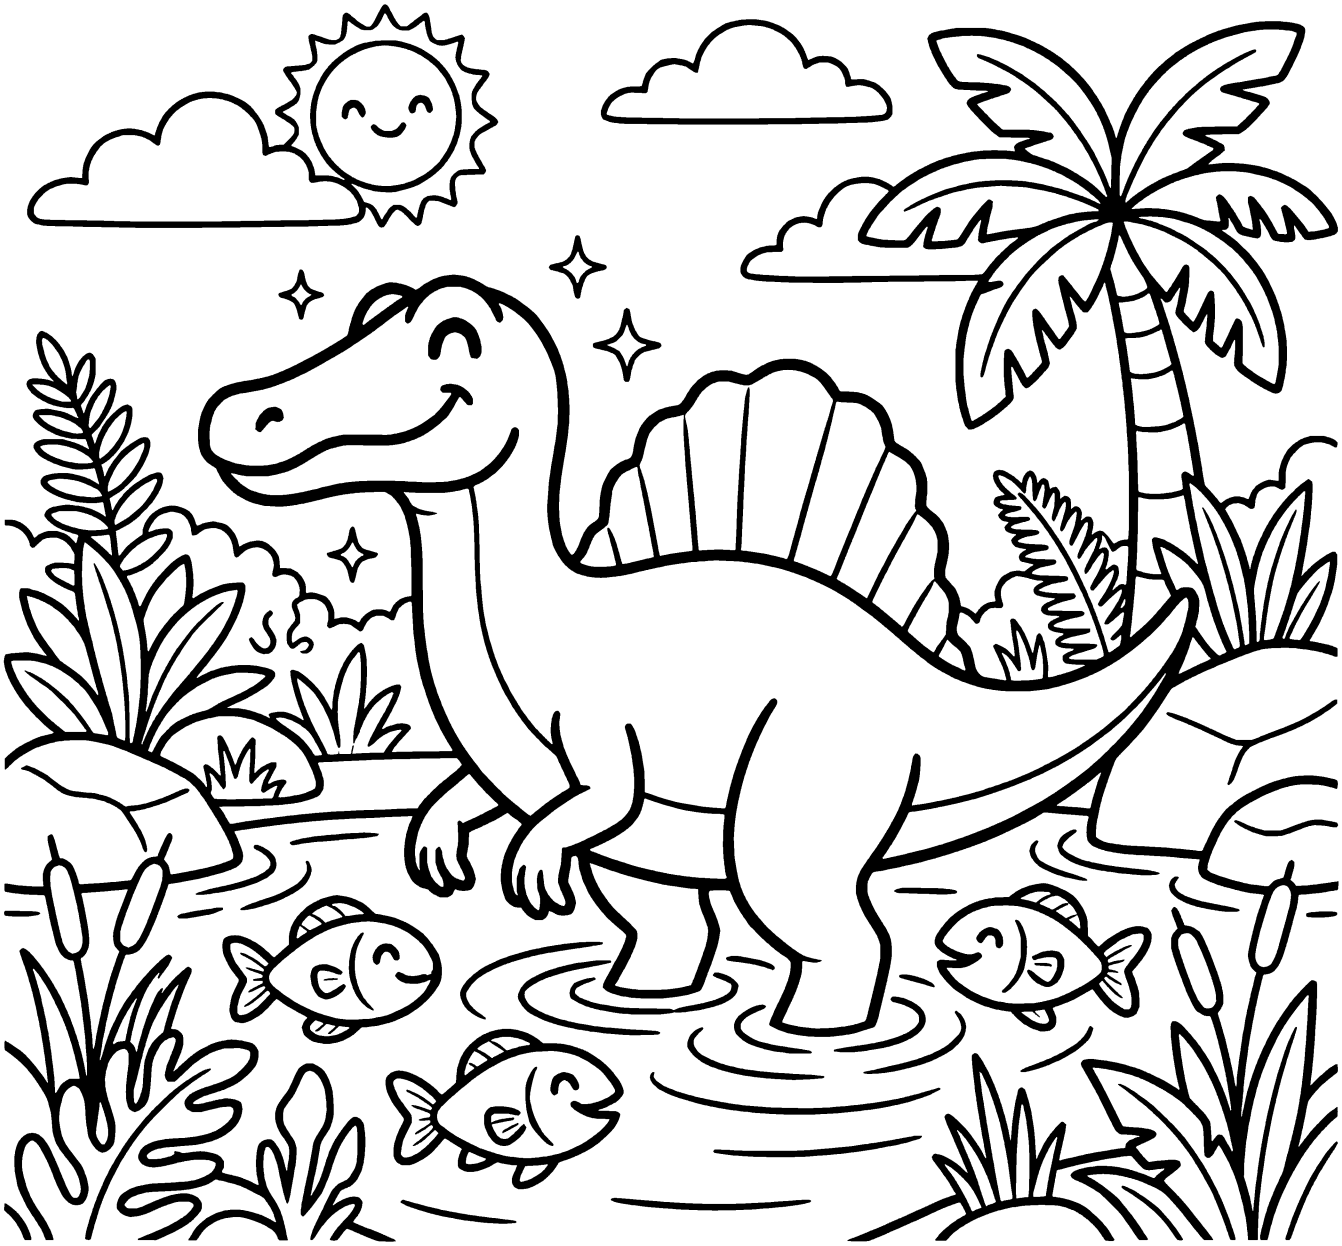

Brachiosaurus had front legs longer than its back legs, like a giraffe.

Velociraptor was about the size of a turkey and was covered in feathers.

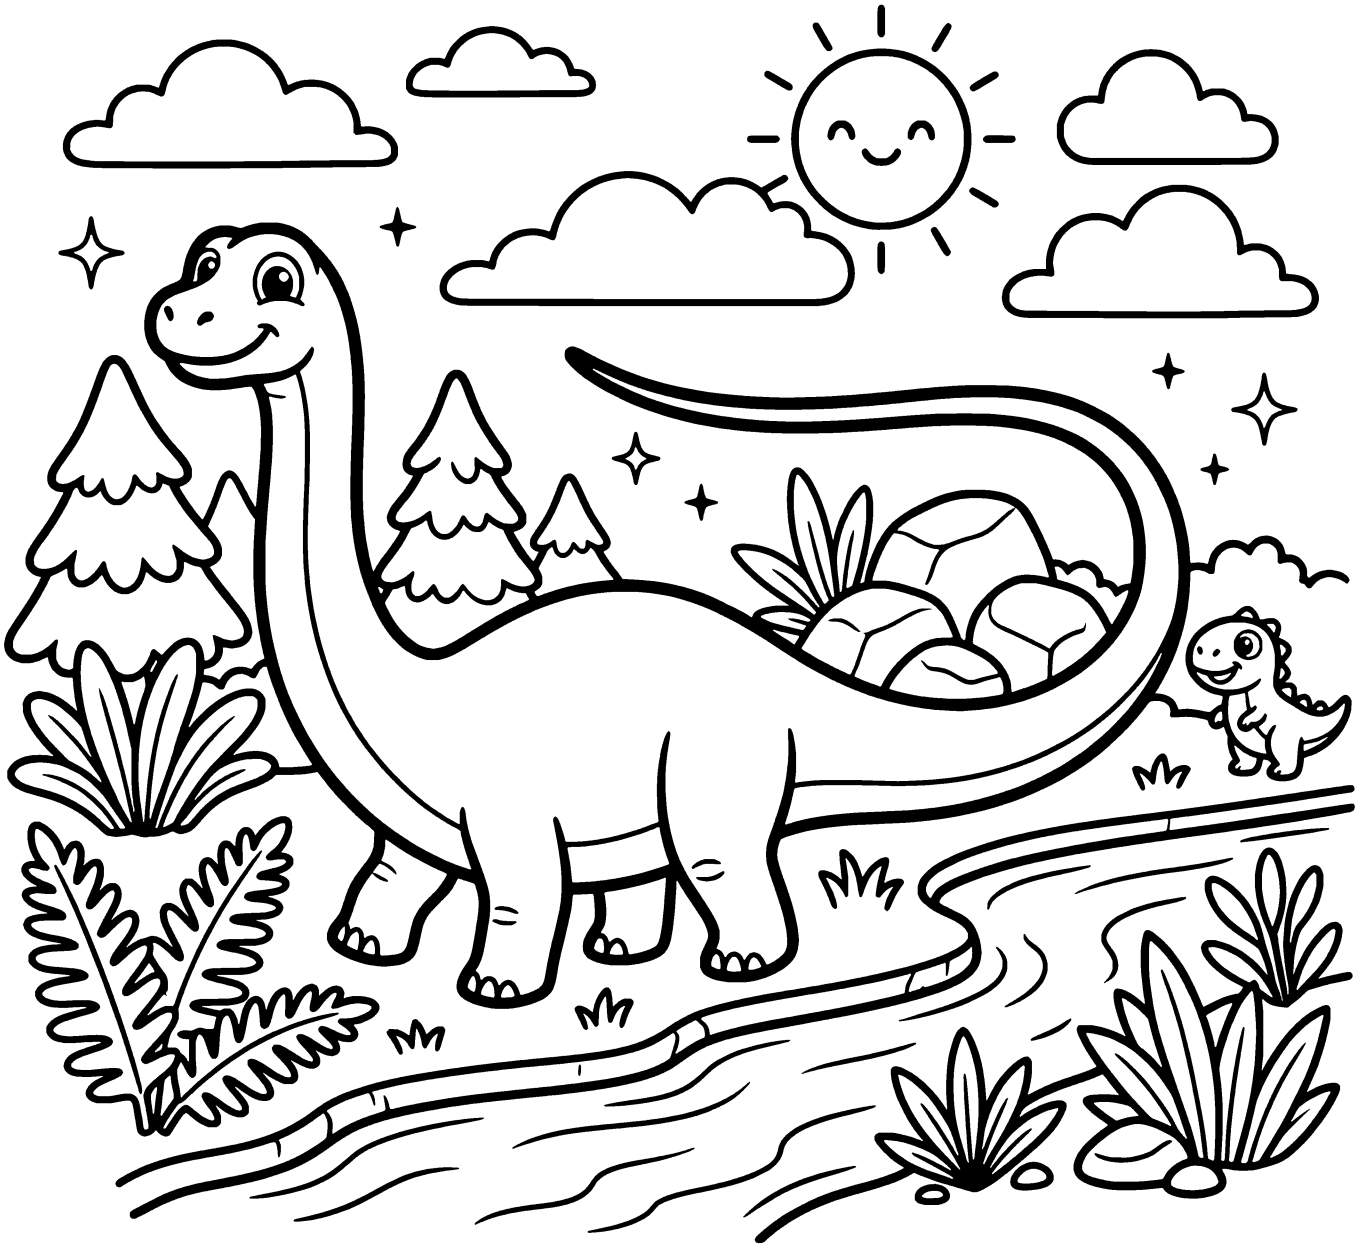

Ankylosaurus had a heavy club of bone at the end of its tail.

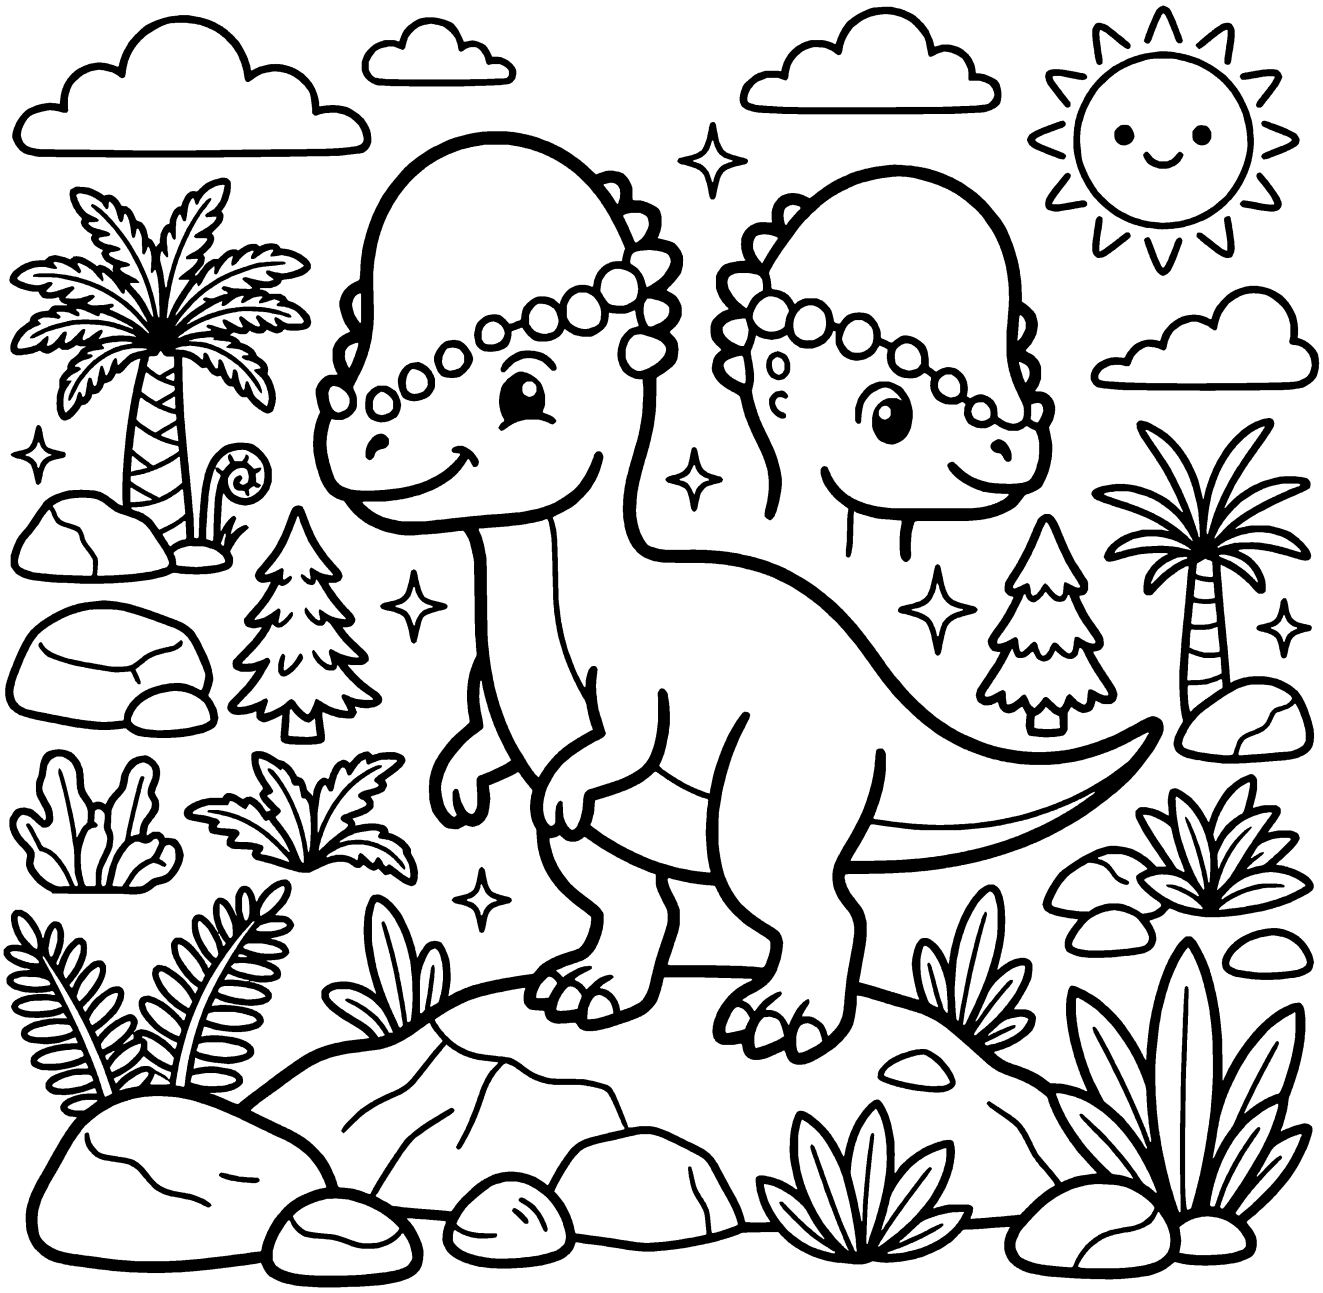

Spinosaurus had a giant sail on its back and spent lots of time in rivers.

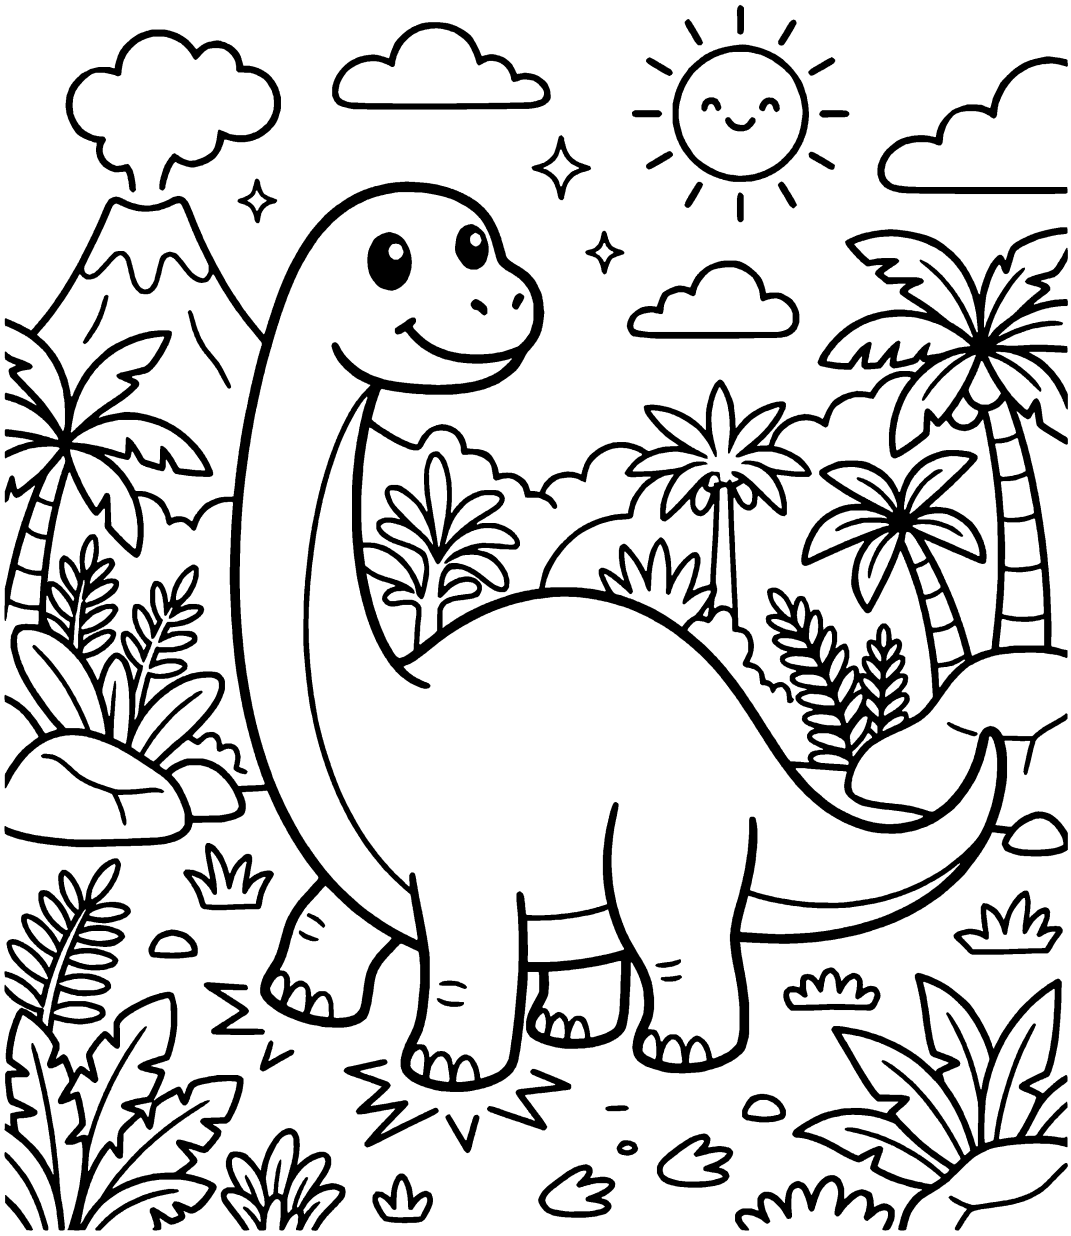

Parasaurolophus could make loud honking sounds through its long, hollow crest.

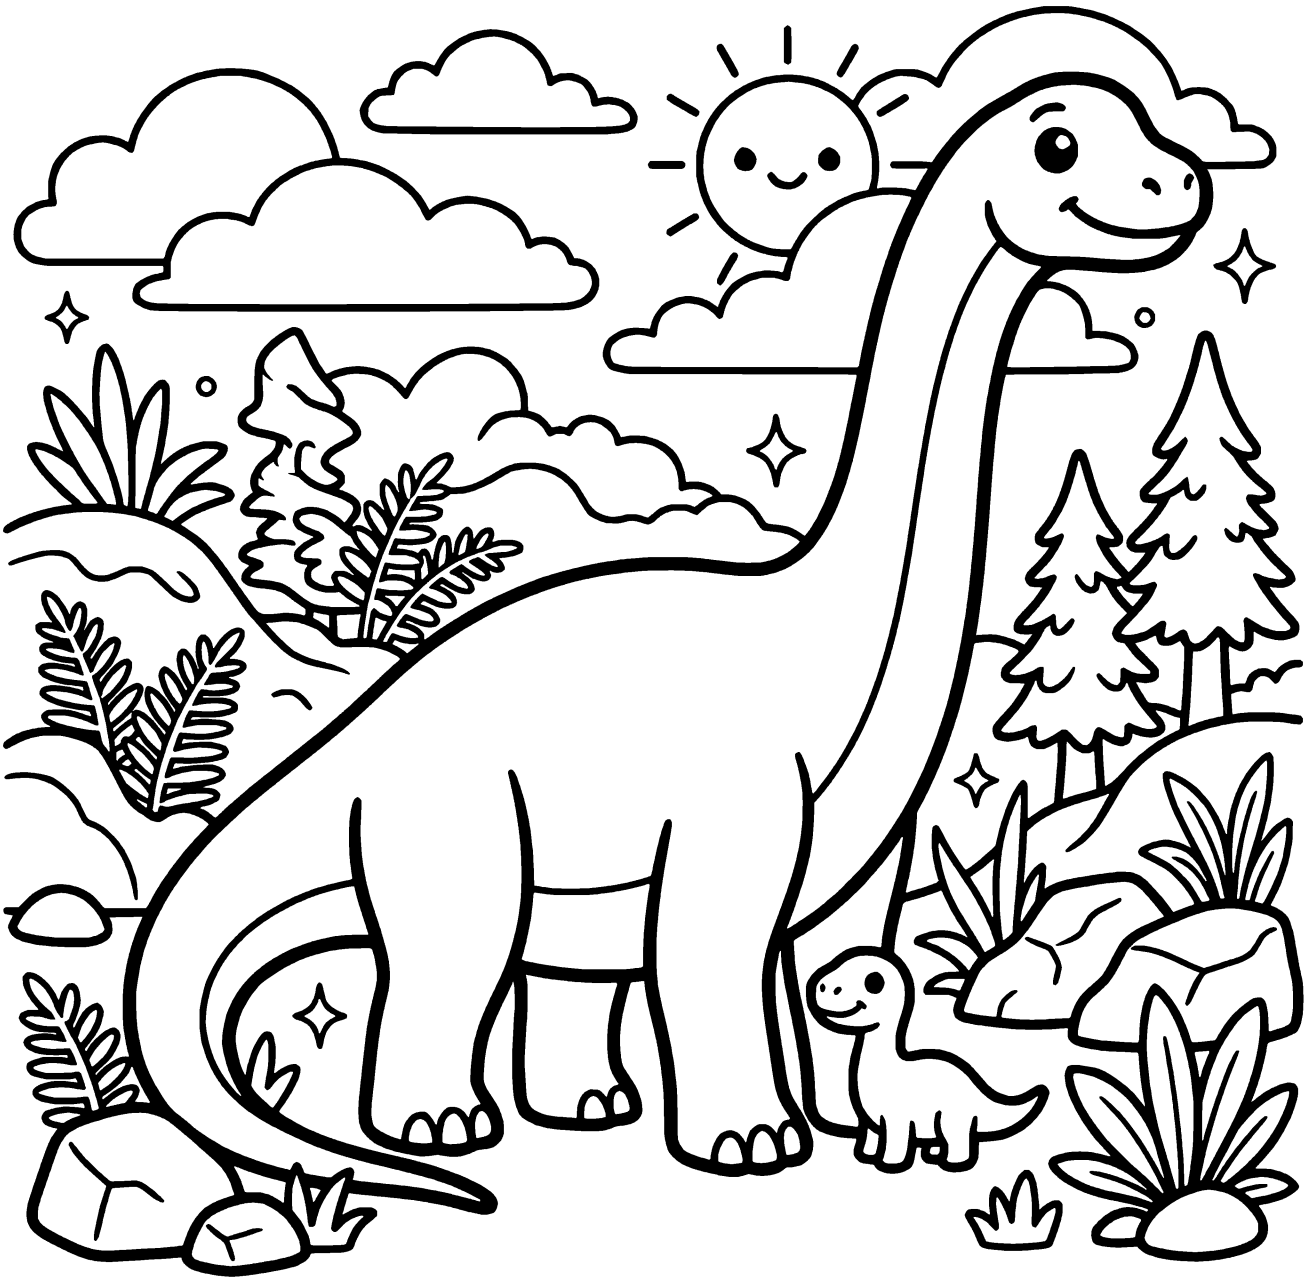

Diplodocus was about as long as two school buses parked end to end.

Pachycephalosaurus had a dome of bone on its head up to 10 inches thick.

Brontosaurus means "thunder lizard."

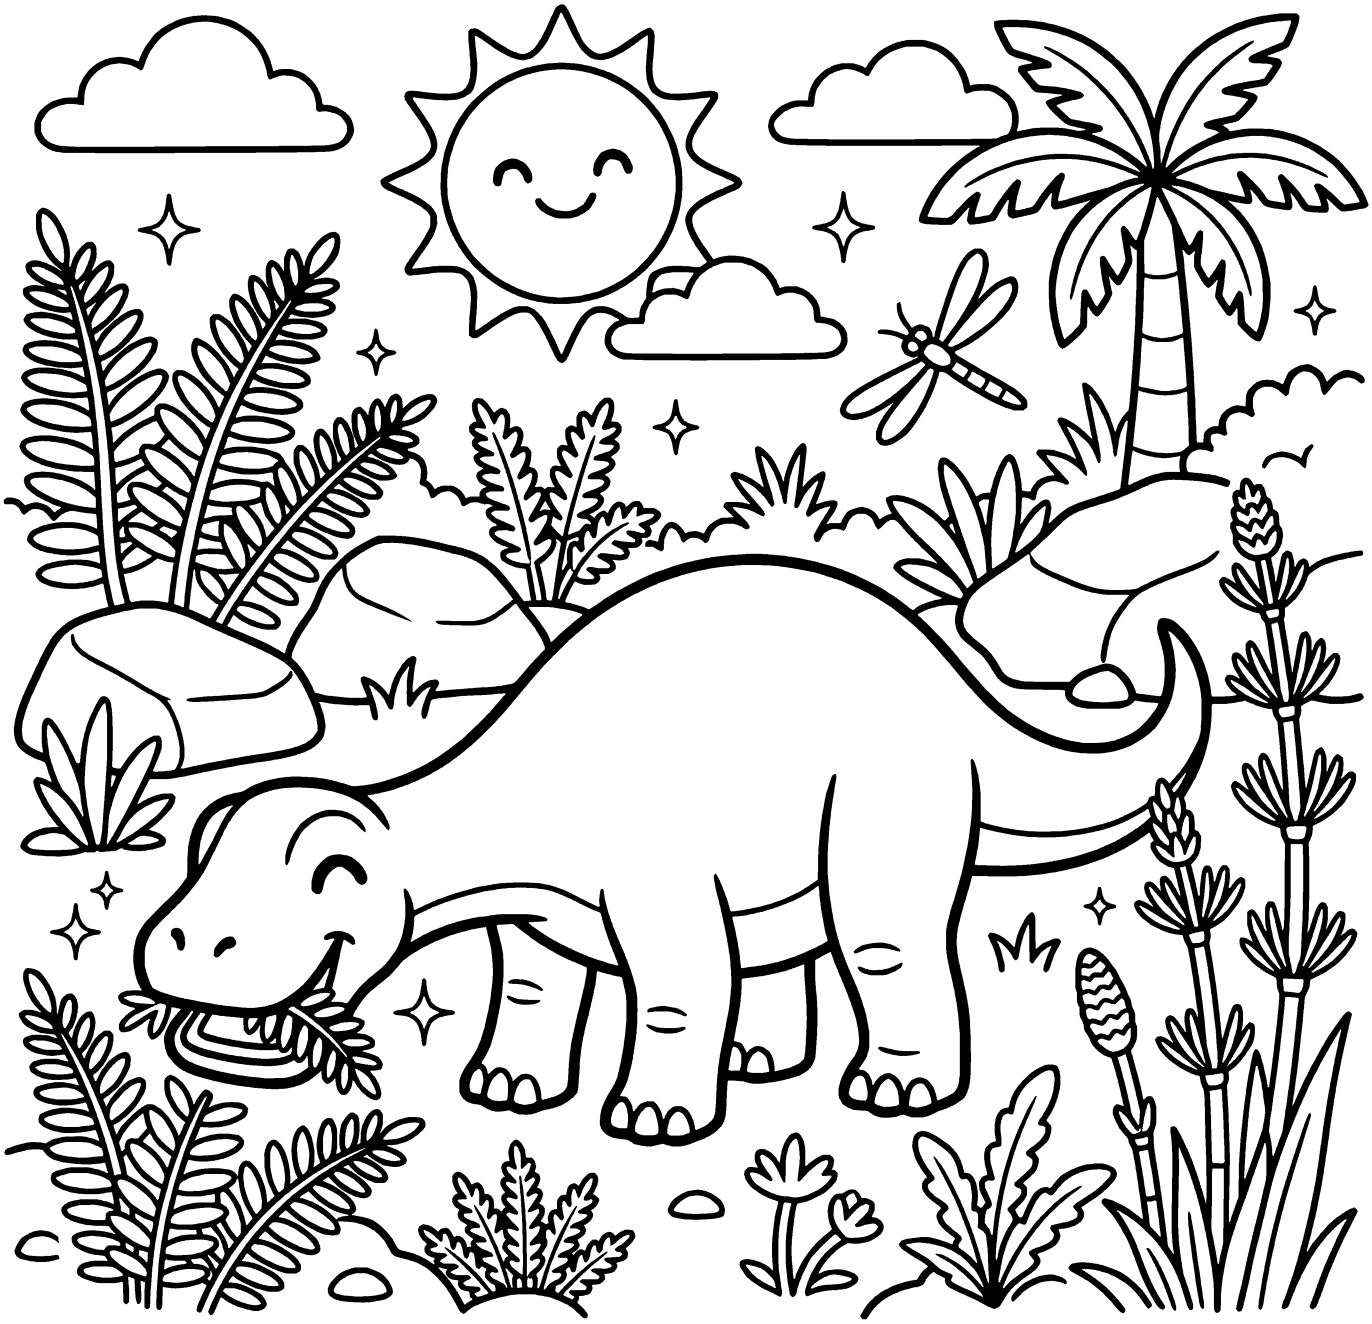

Argentinosaurus was one of the biggest animals ever to walk on land.

Mamenchisaurus had a neck about half as long as its whole body.

Amargasaurus had two rows of tall spines running down its neck.

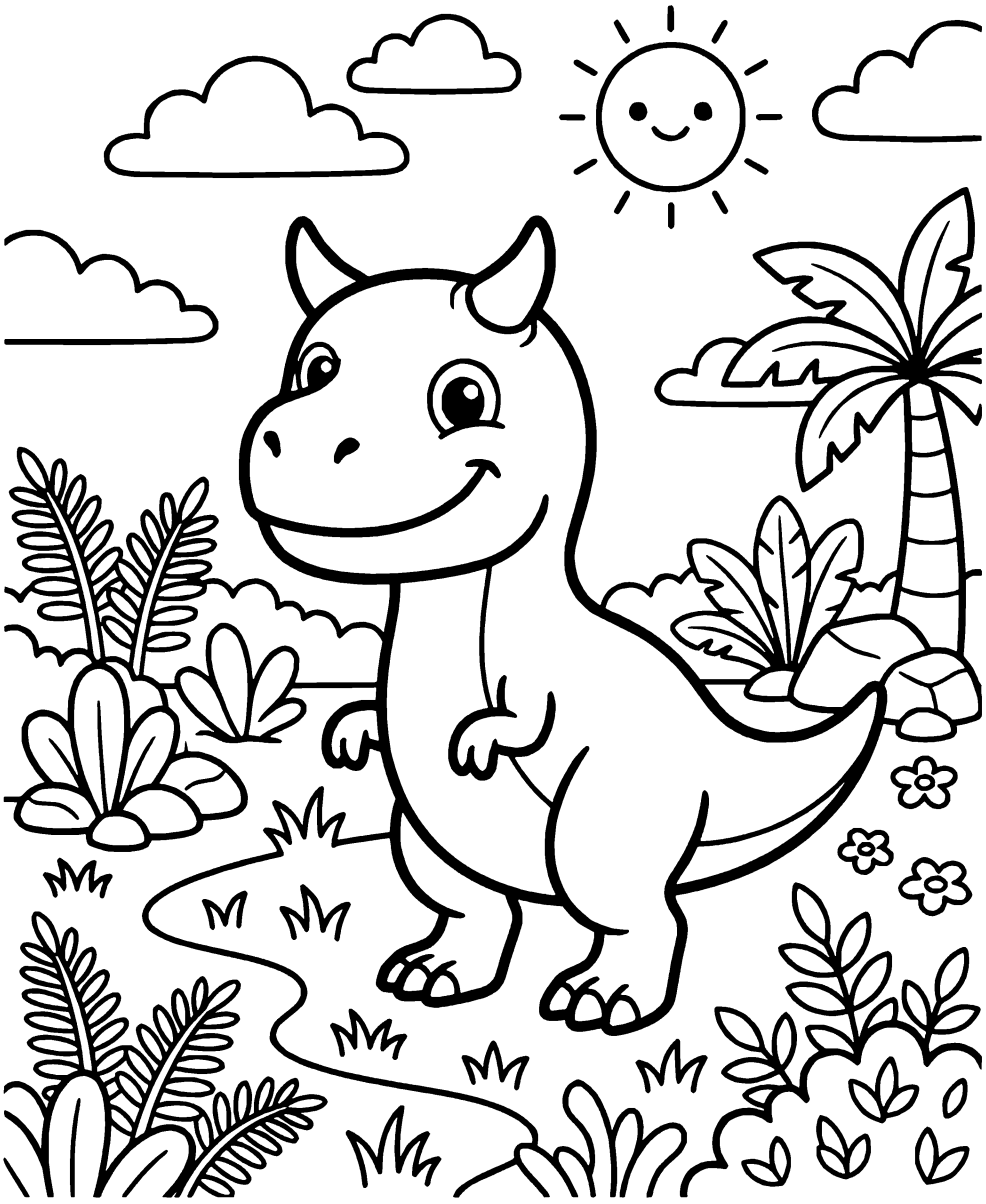

Nigersaurus had more than 500 teeth in its wide, flat mouth!

Allosaurus lived about 80 million years before T. rex.

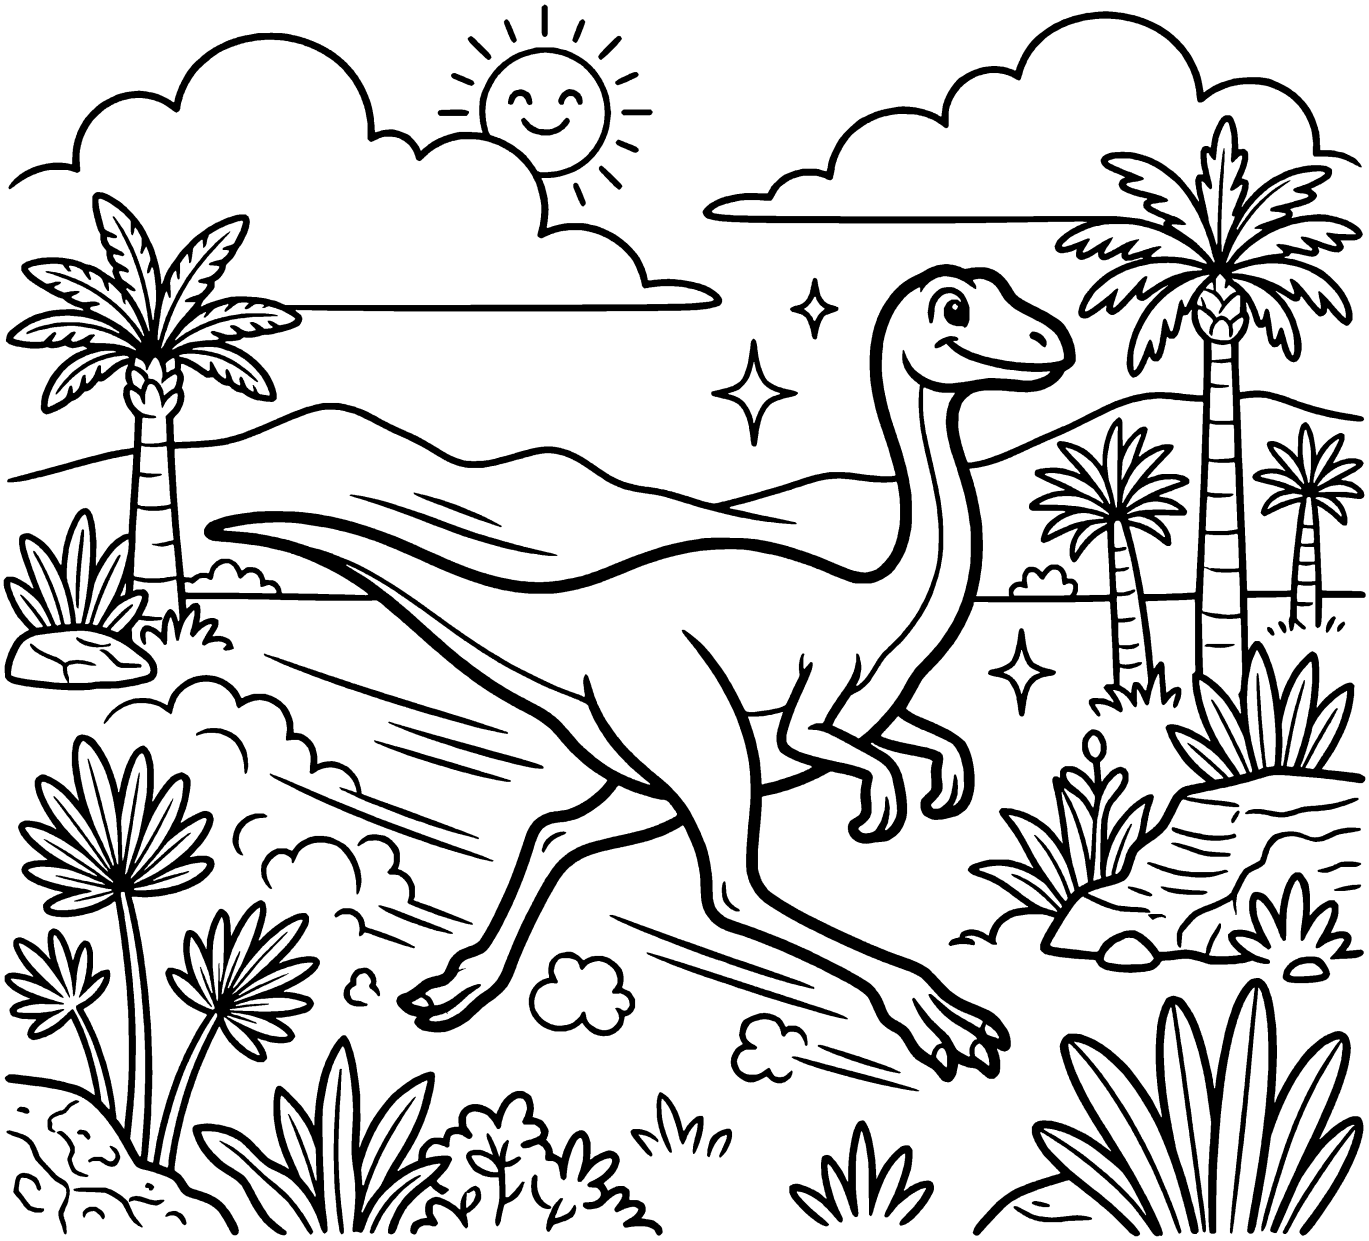

Dilophosaurus had two thin crests on top of its head.

Carnotaurus had two short horns above its eyes, like a bull.

Compsognathus was a tiny dinosaur, about the size of a chicken.

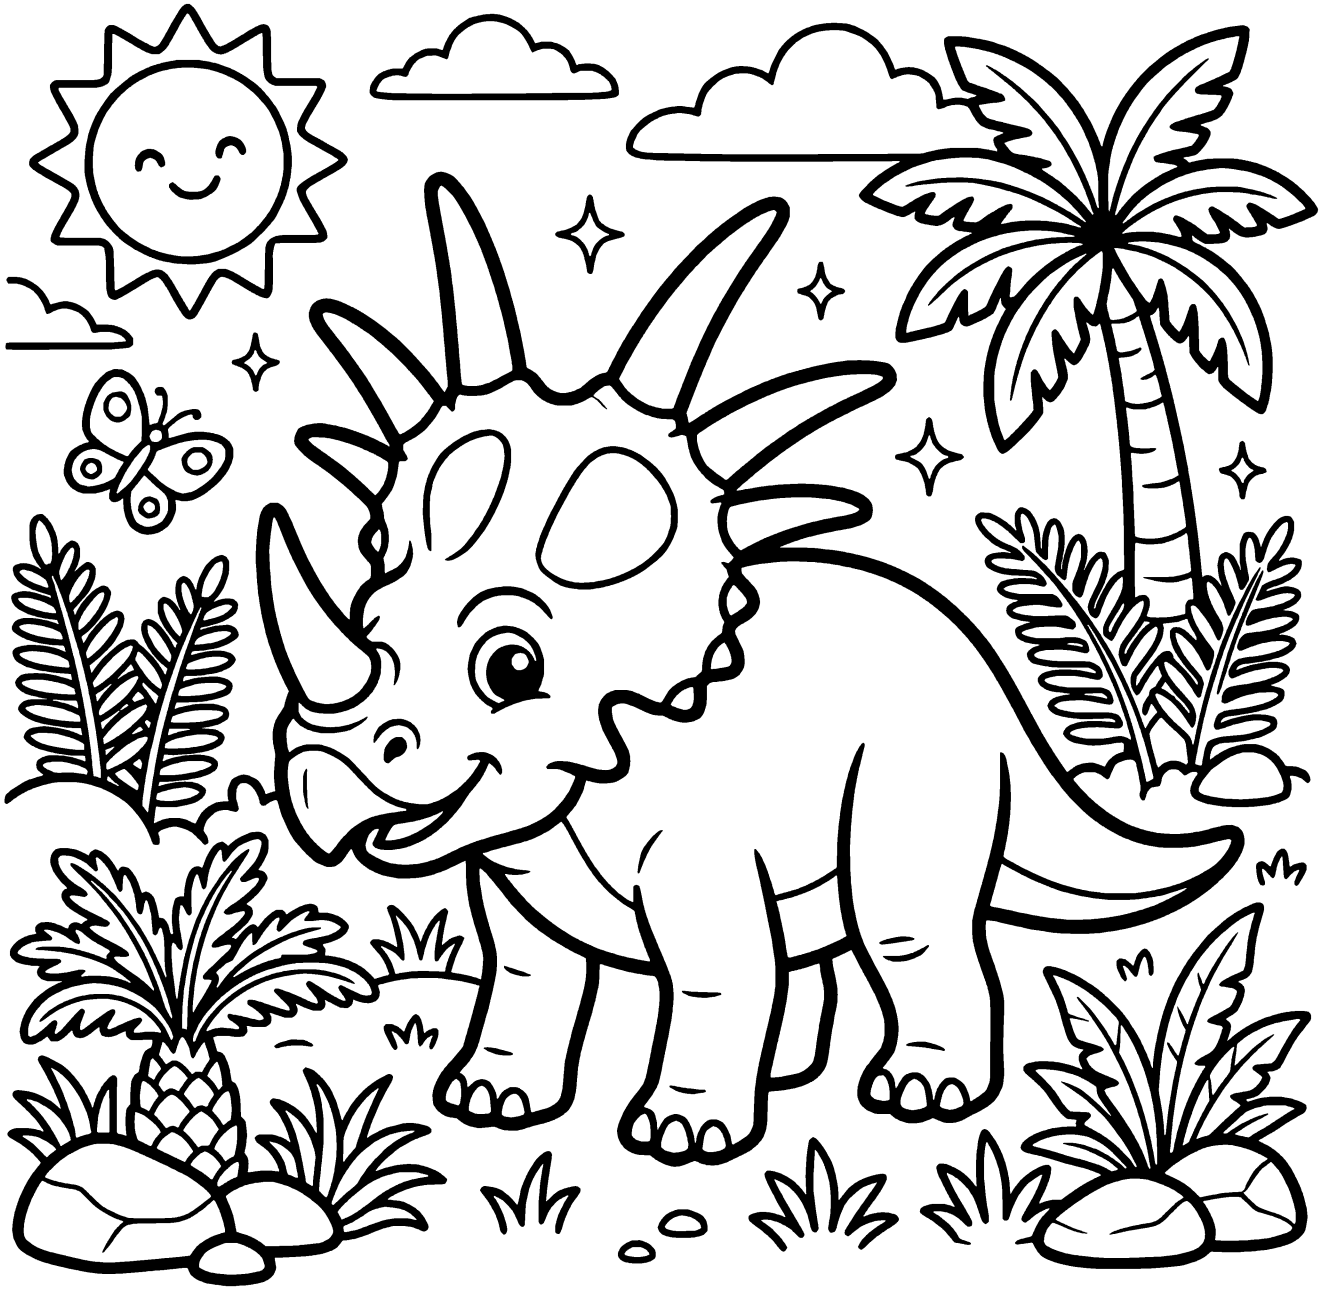

Gallimimus means "chicken mimic," but it ran as fast as an ostrich.

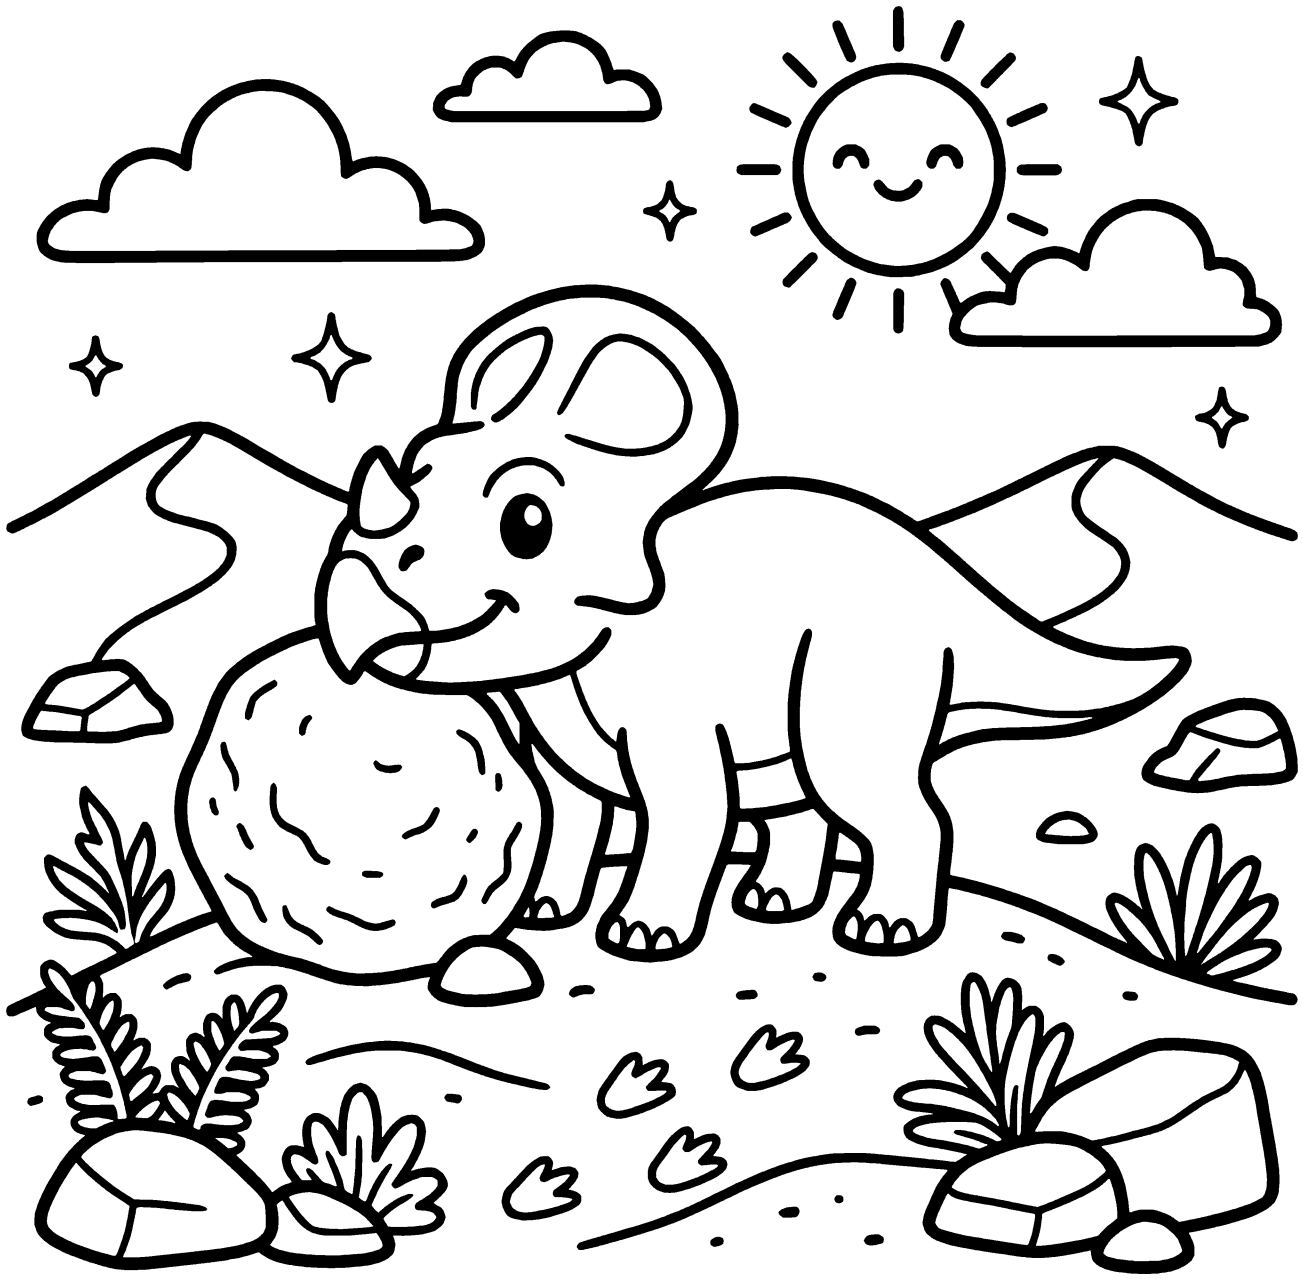

Troodon had big eyes and a big brain for its size.

Therizinosaurus had claws about 3 feet long, but it mostly ate plants.

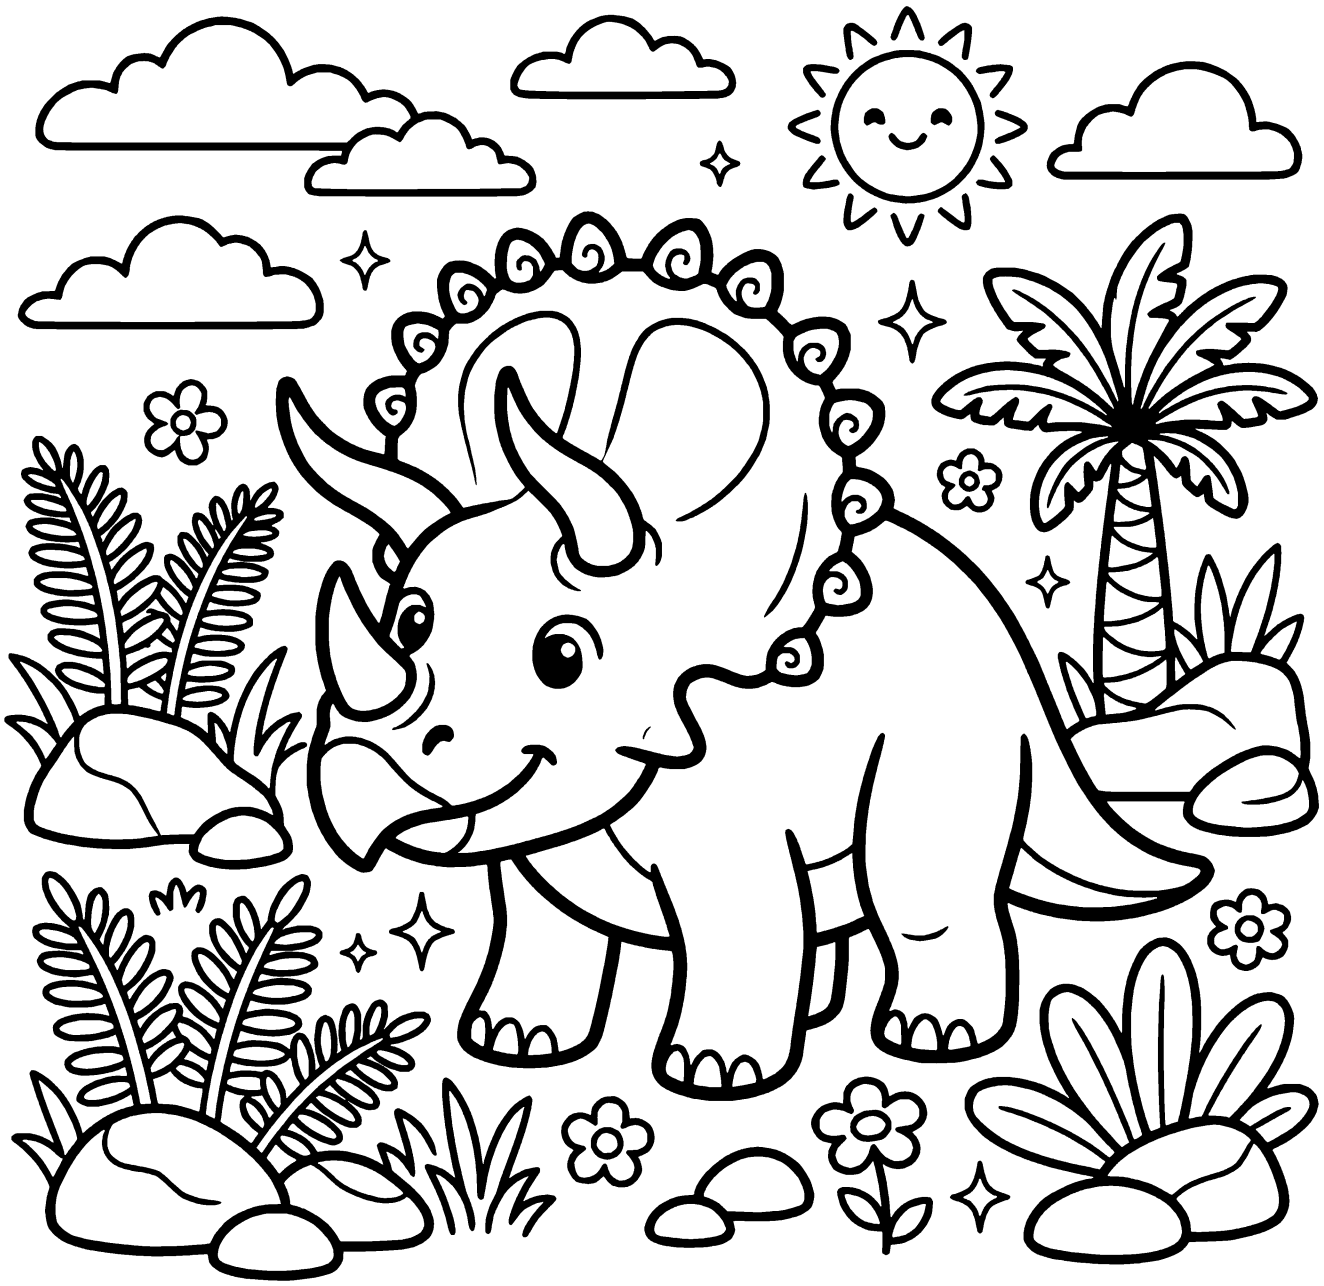

Styracosaurus had a crown of long spikes around its frill.

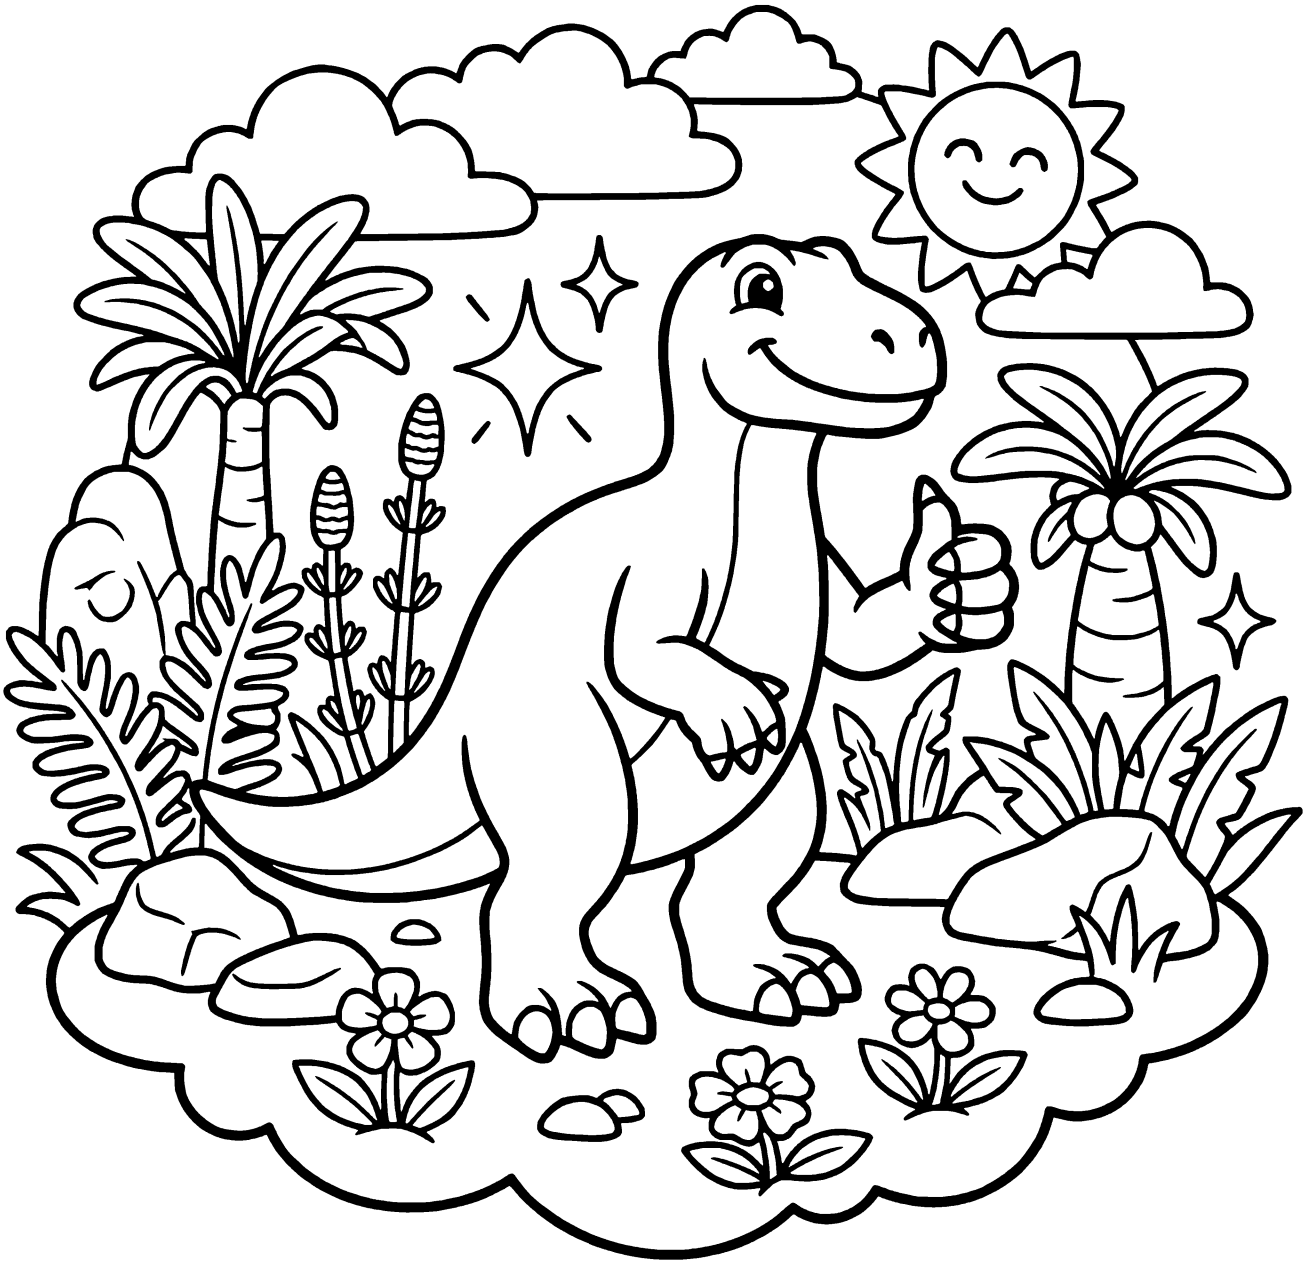

Protoceratops was about the size of a sheep.

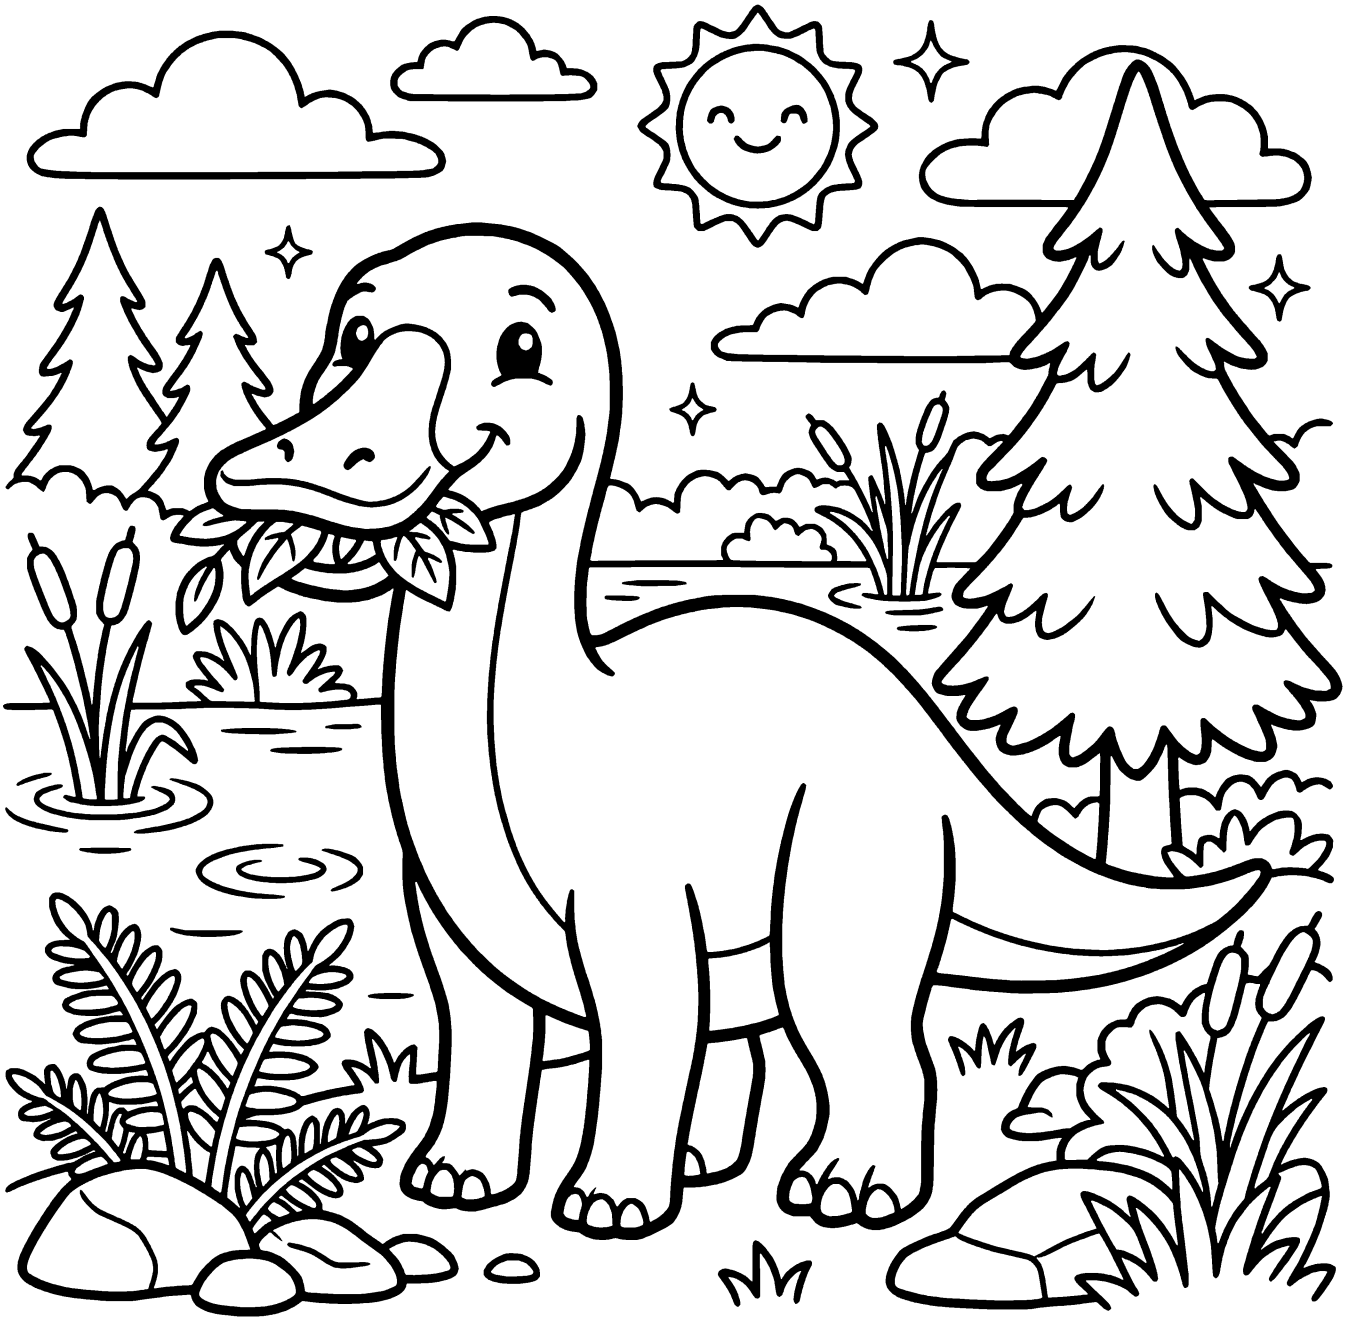

Psittacosaurus had a beak like a parrot's.

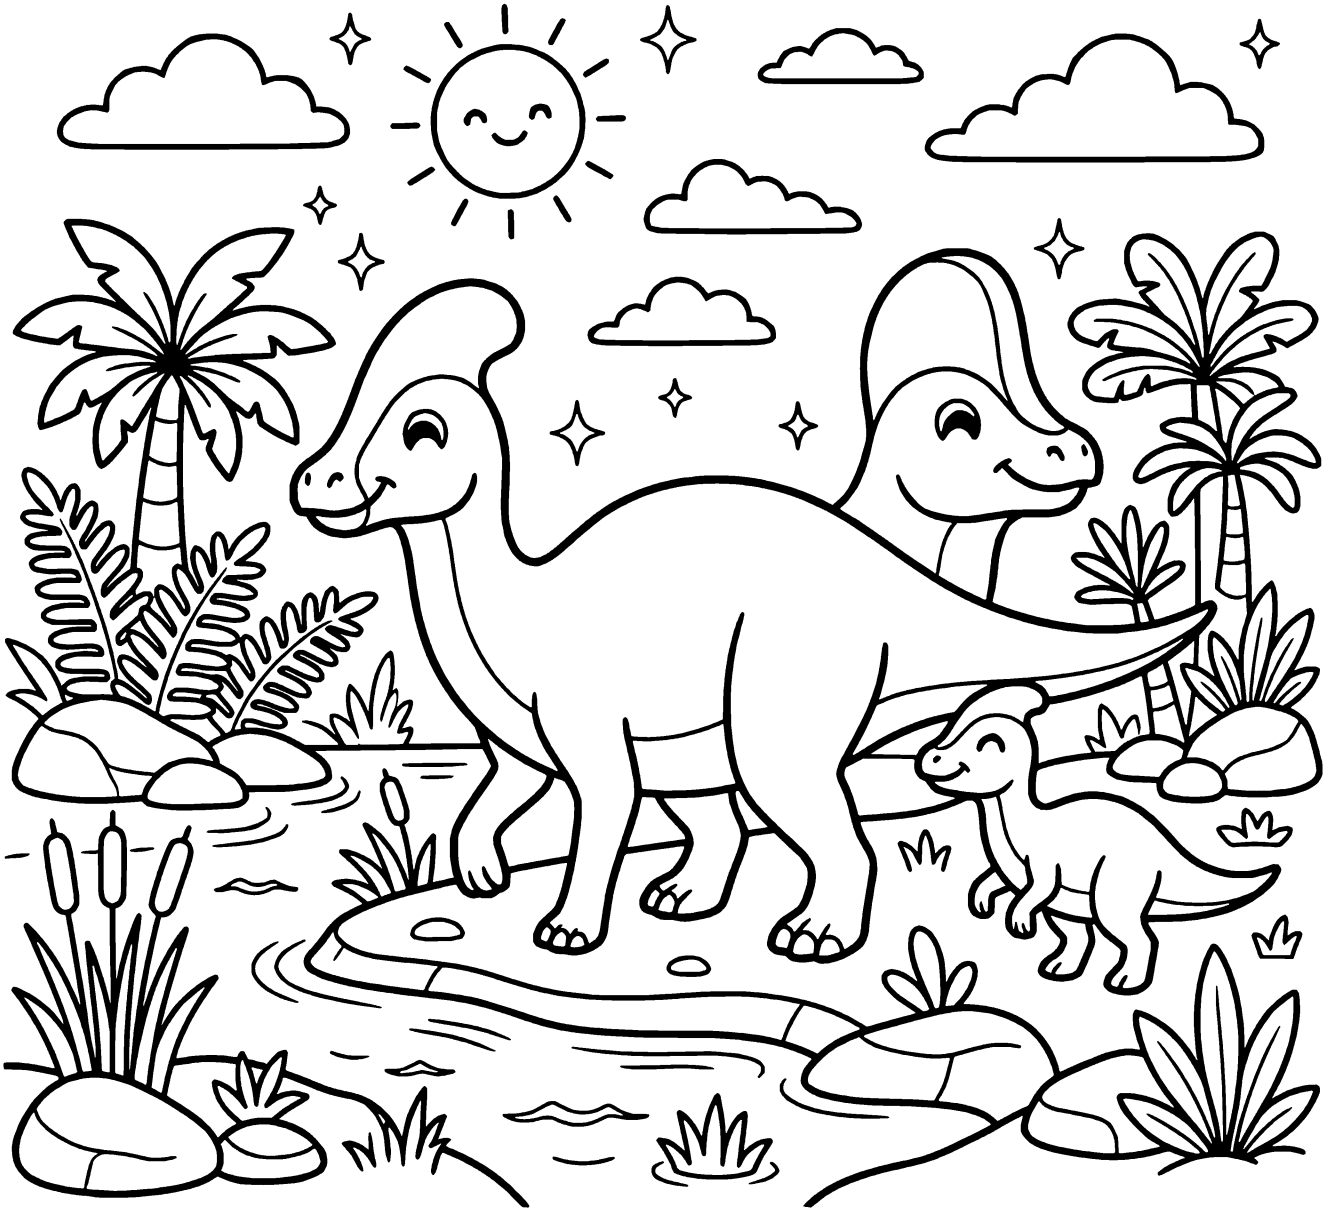

Kosmoceratops had 15 horns, the most of any dinosaur we know.

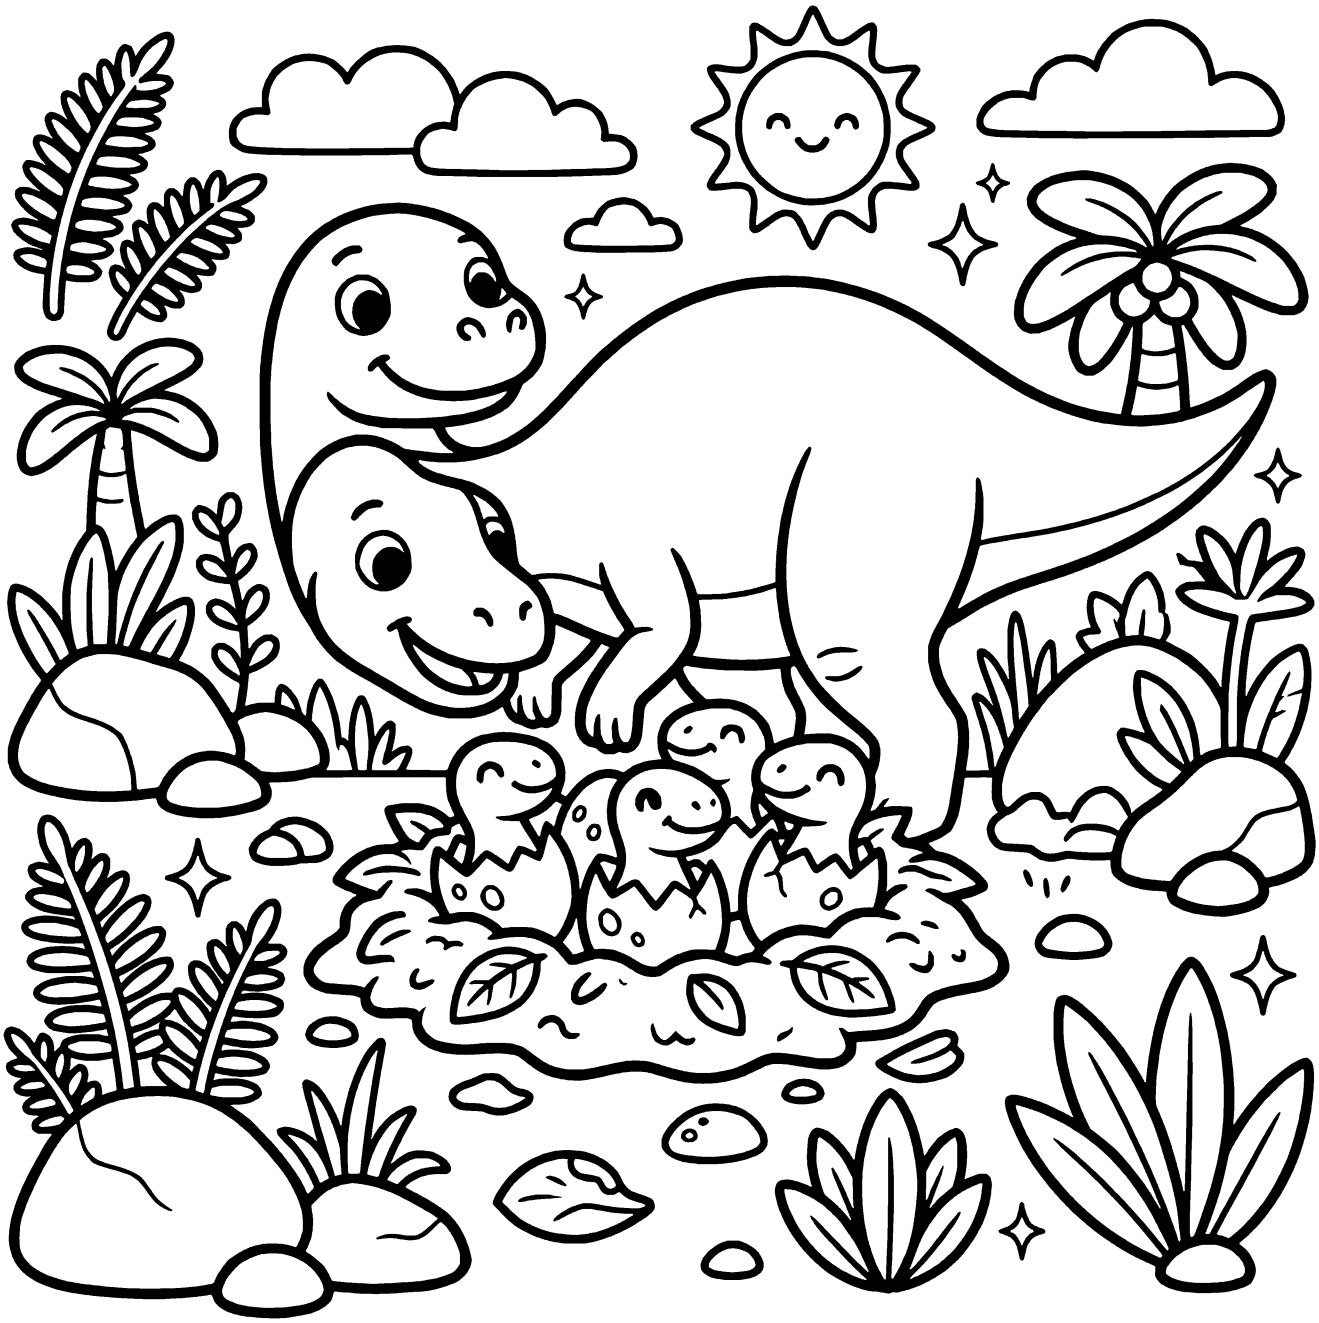

Scientists once put Iguanodon's thumb spike on its nose by mistake!

Edmontosaurus had hundreds of teeth packed together for grinding plants.

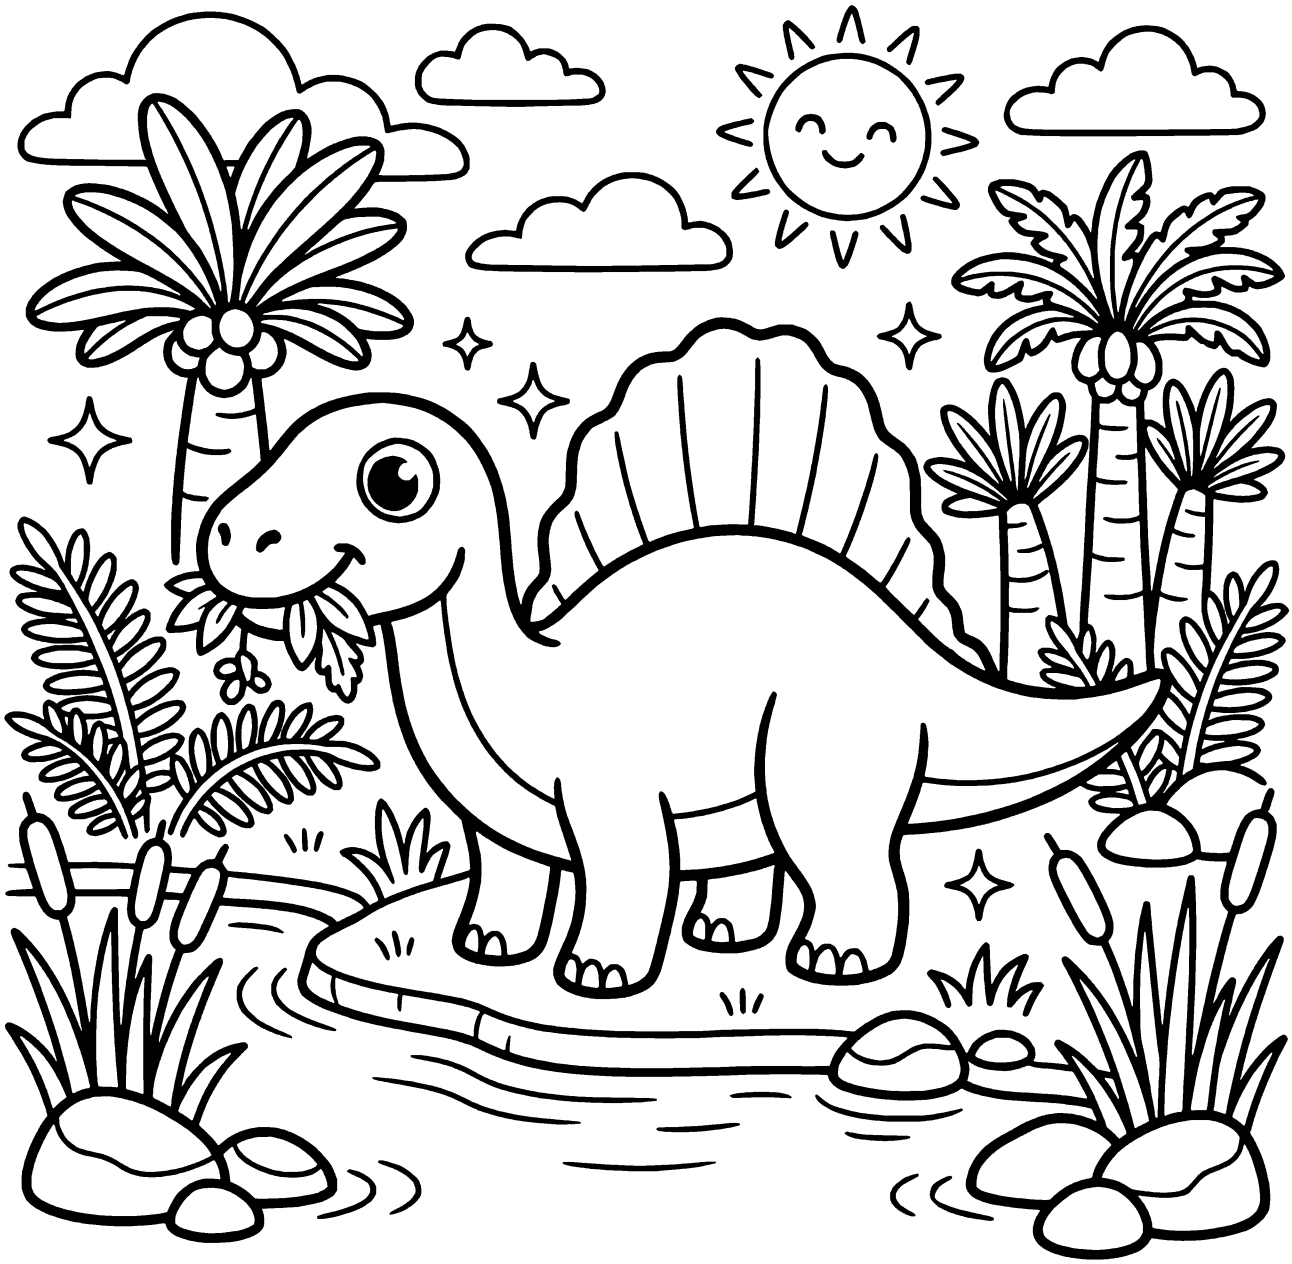

Corythosaurus had a tall crest shaped like a helmet.

Maiasaura means "good mother lizard." It looked after its babies in nests.

Oviraptor sat on its nest to keep its eggs warm, just like a bird.

Ouranosaurus had a tall sail on its back, and it only ate plants.

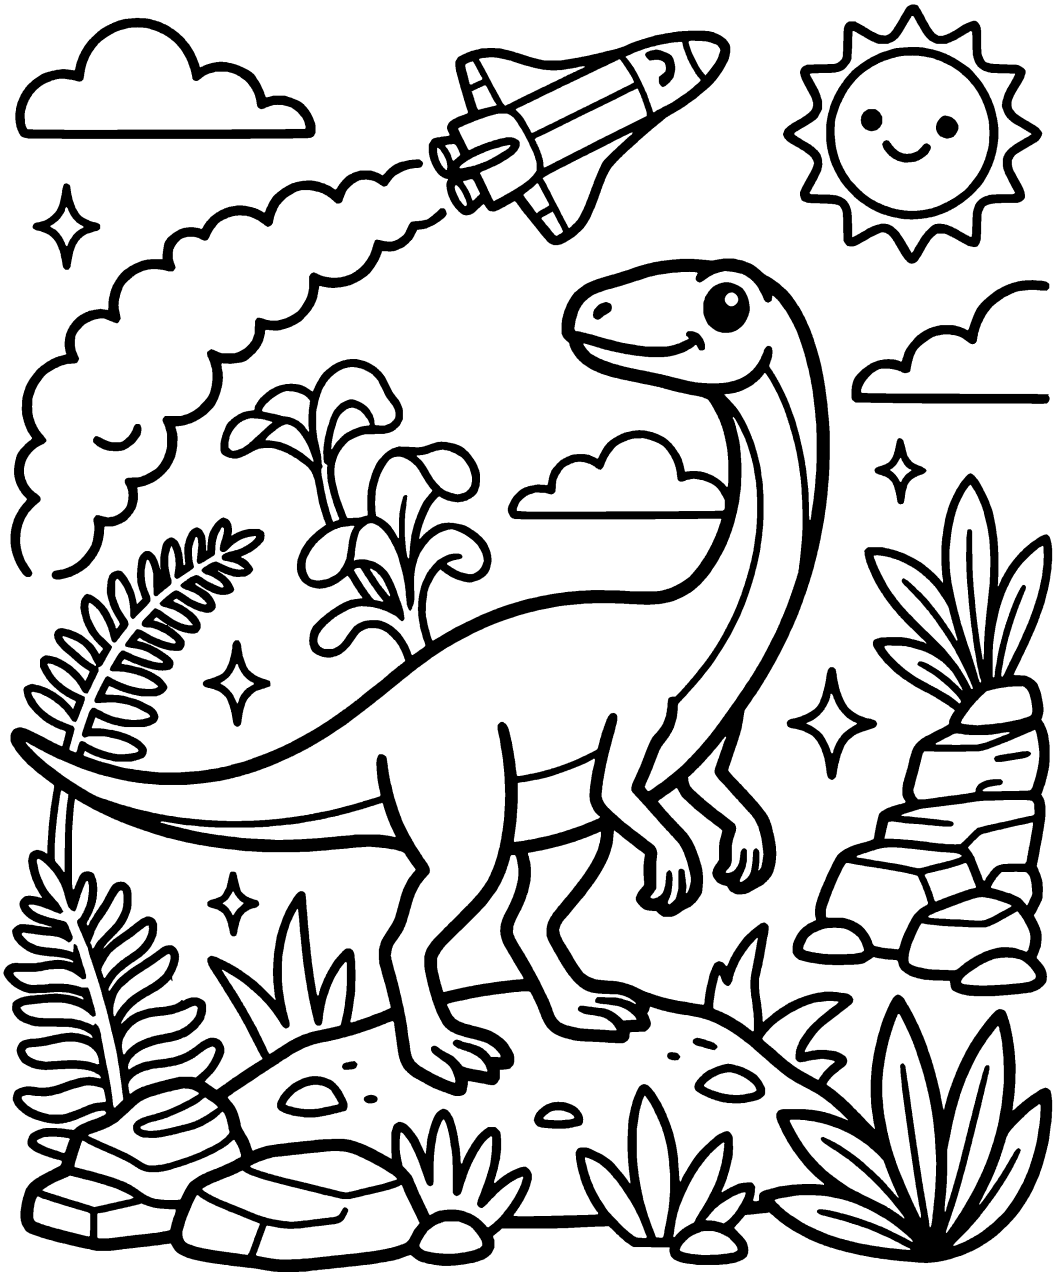

Microraptor had feathers on its arms and legs and could glide between trees.

Sinosauropteryx was covered in fuzzy feathers and had a striped tail.

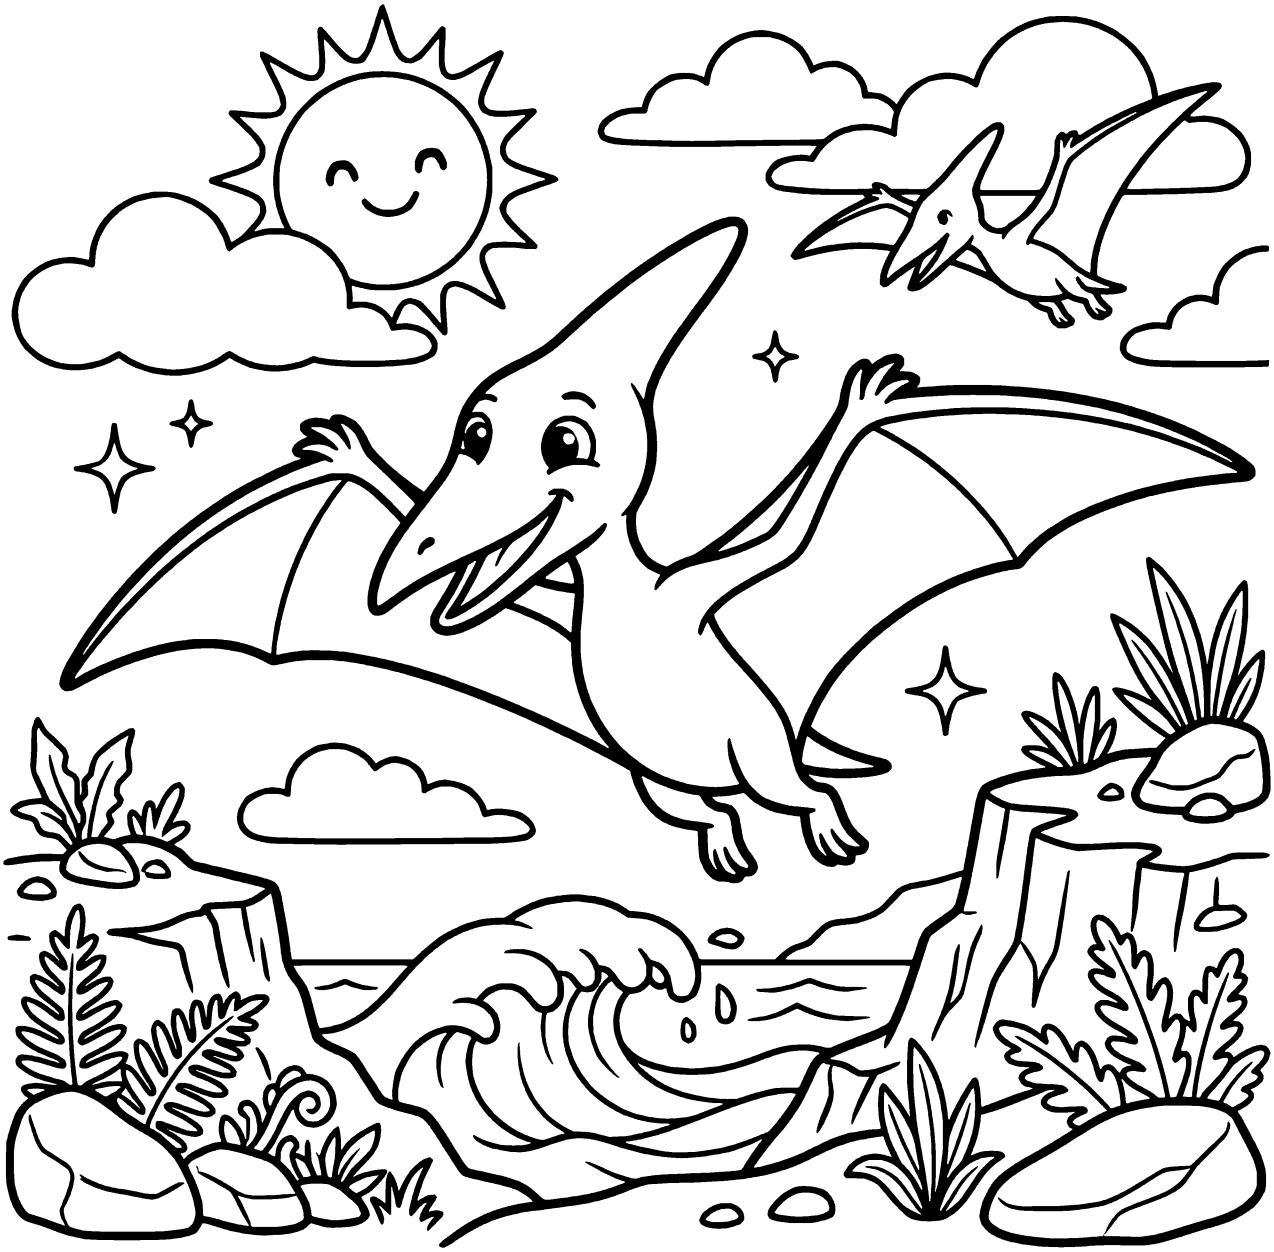

Archaeopteryx had feathers, wings and teeth: part dinosaur, part bird.

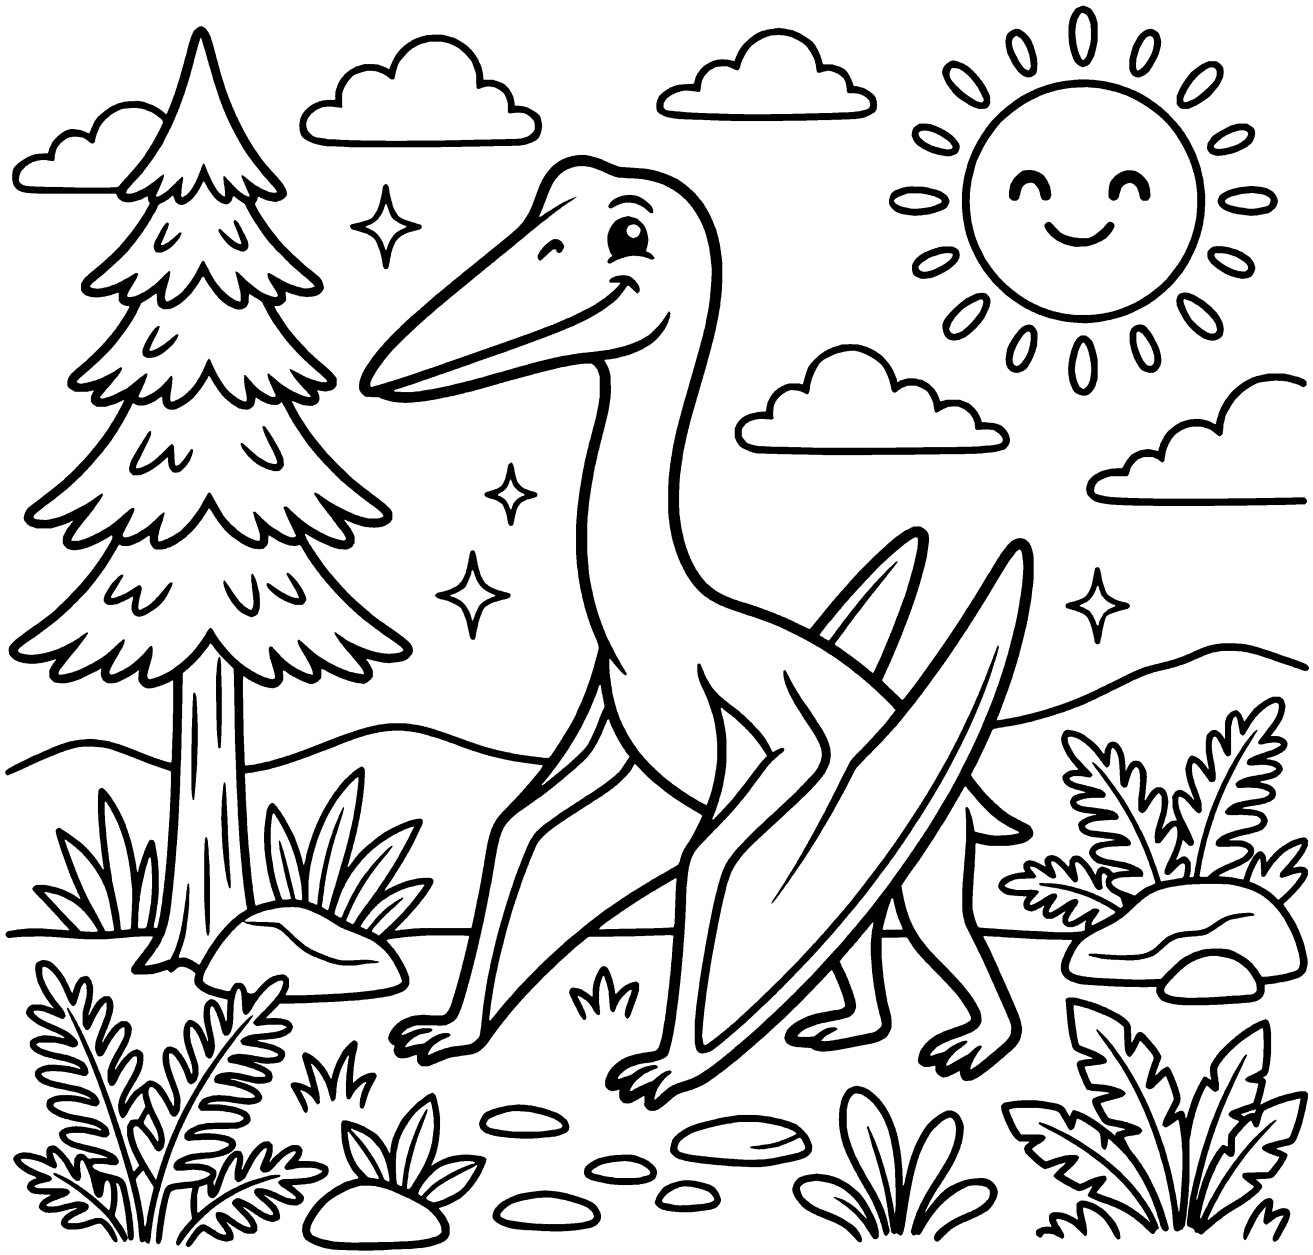

A Coelophysis skull once flew into space on a space shuttle!

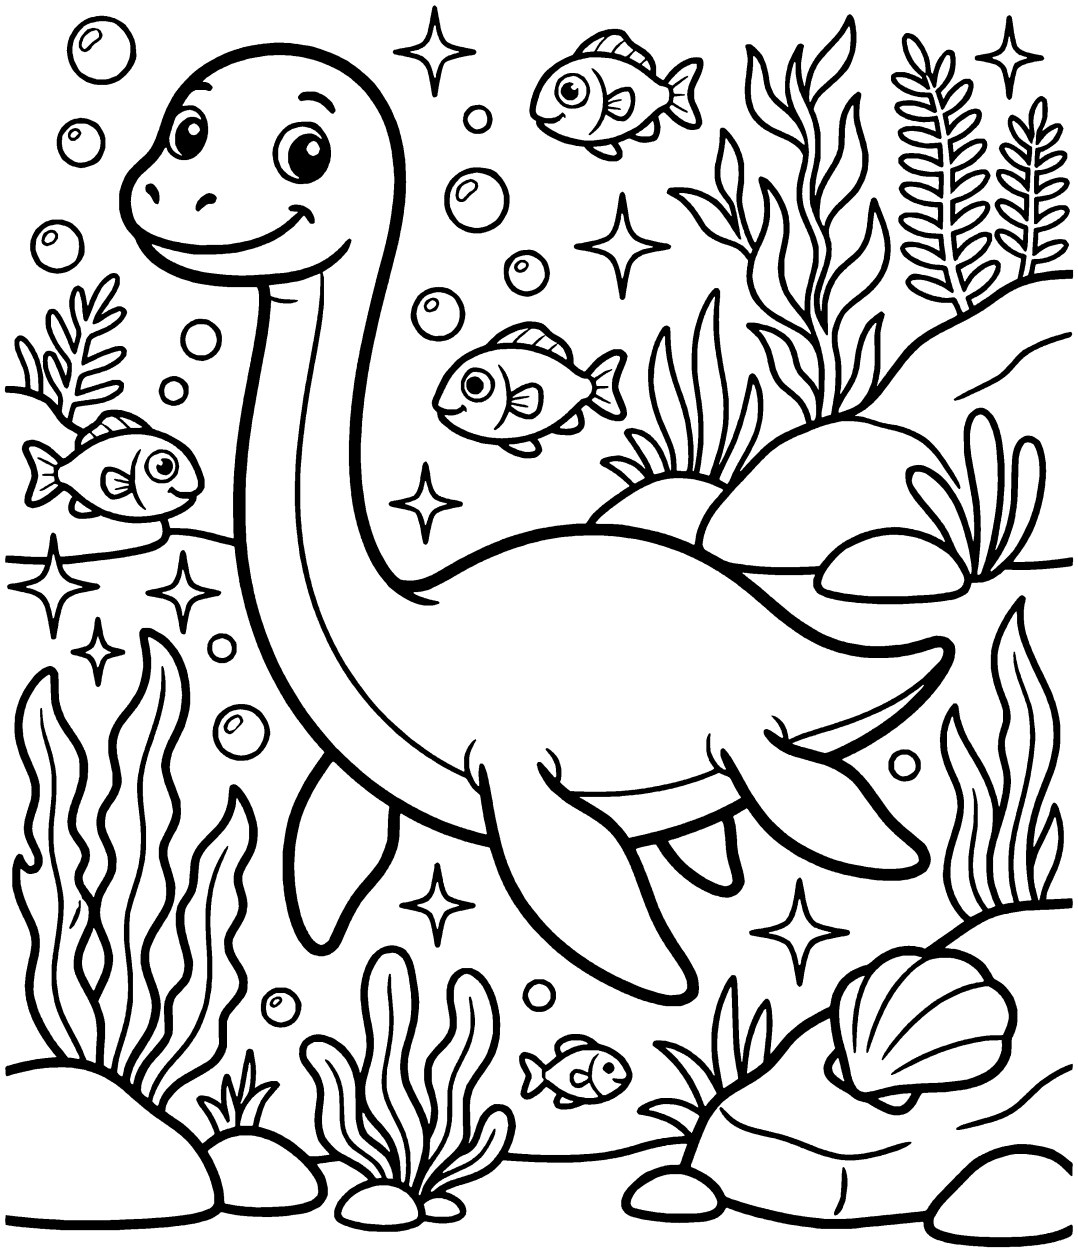

Dimetrodon lived before the first dinosaurs, and it was not a dinosaur.

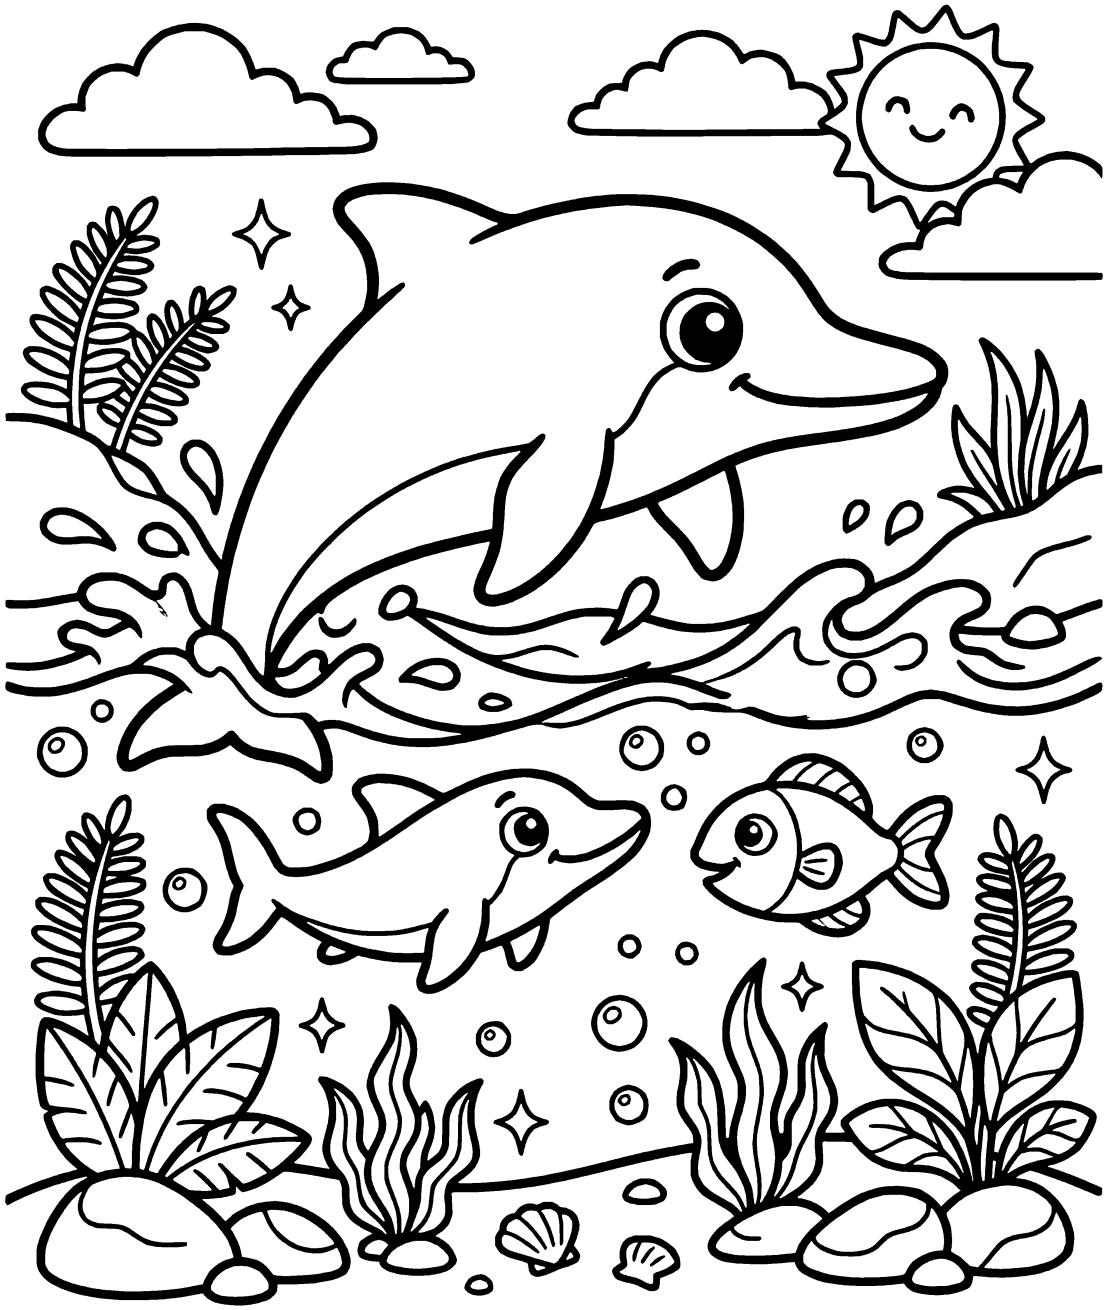

Pteranodon could fly, but it was a flying reptile, not a dinosaur.

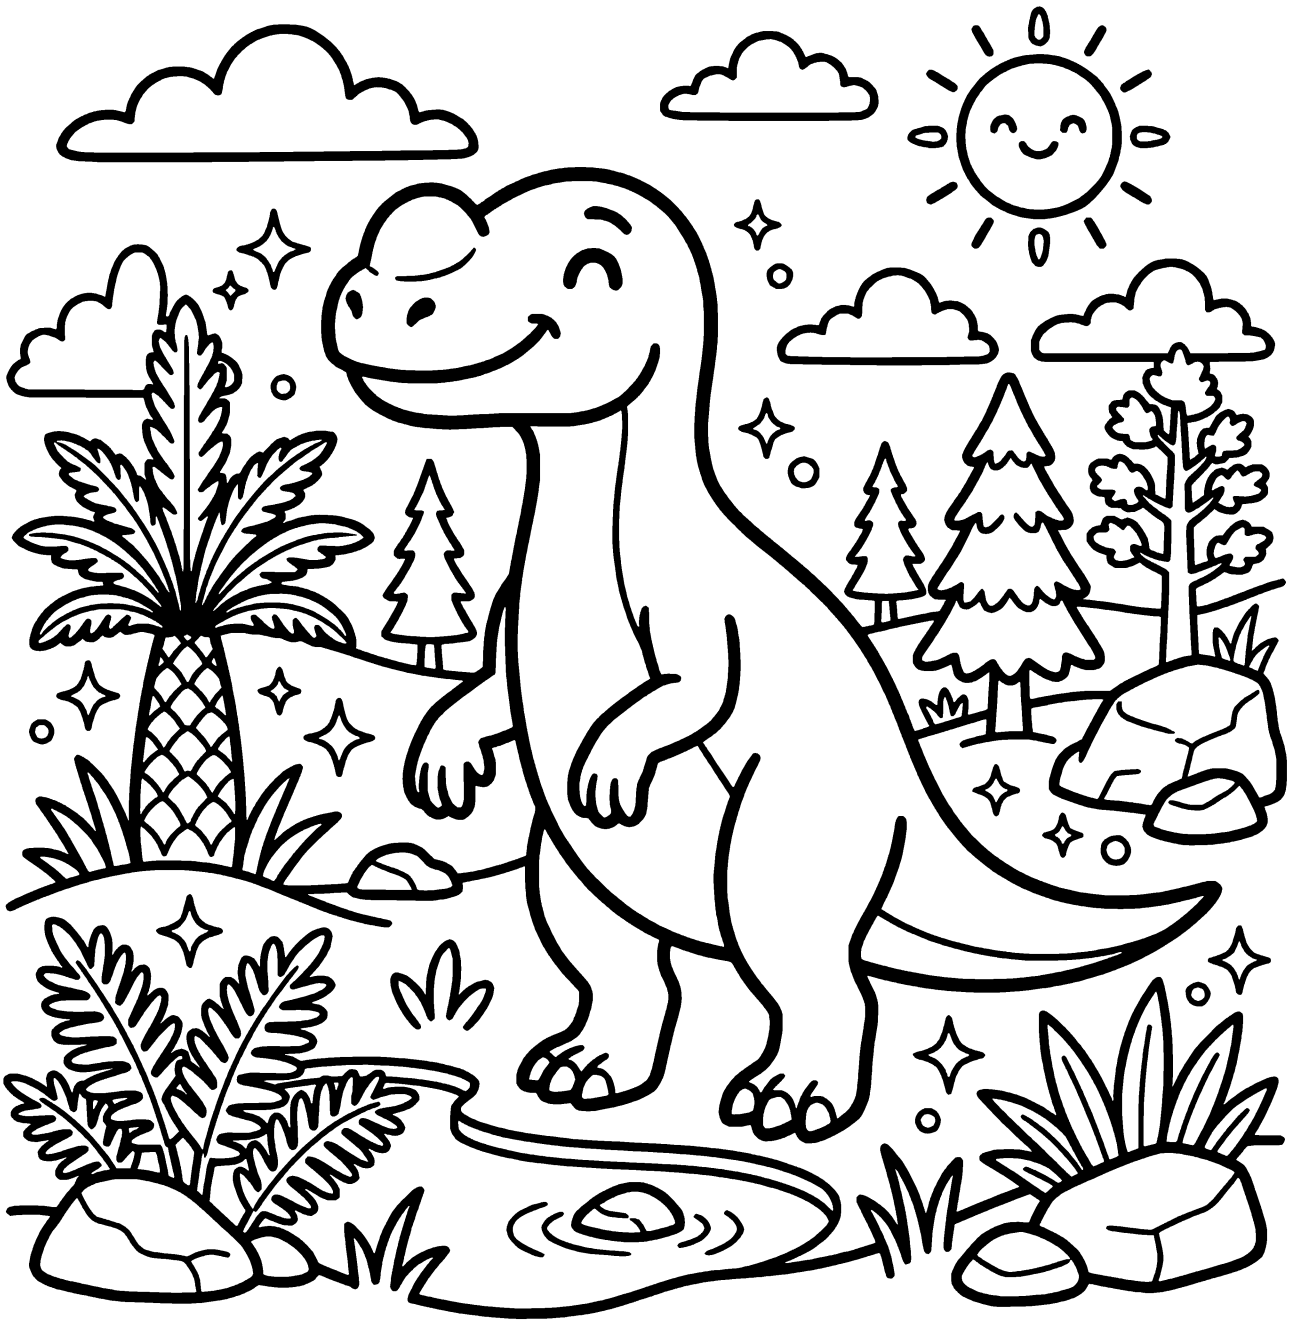

Quetzalcoatlus was as tall as a giraffe when it stood on the ground.

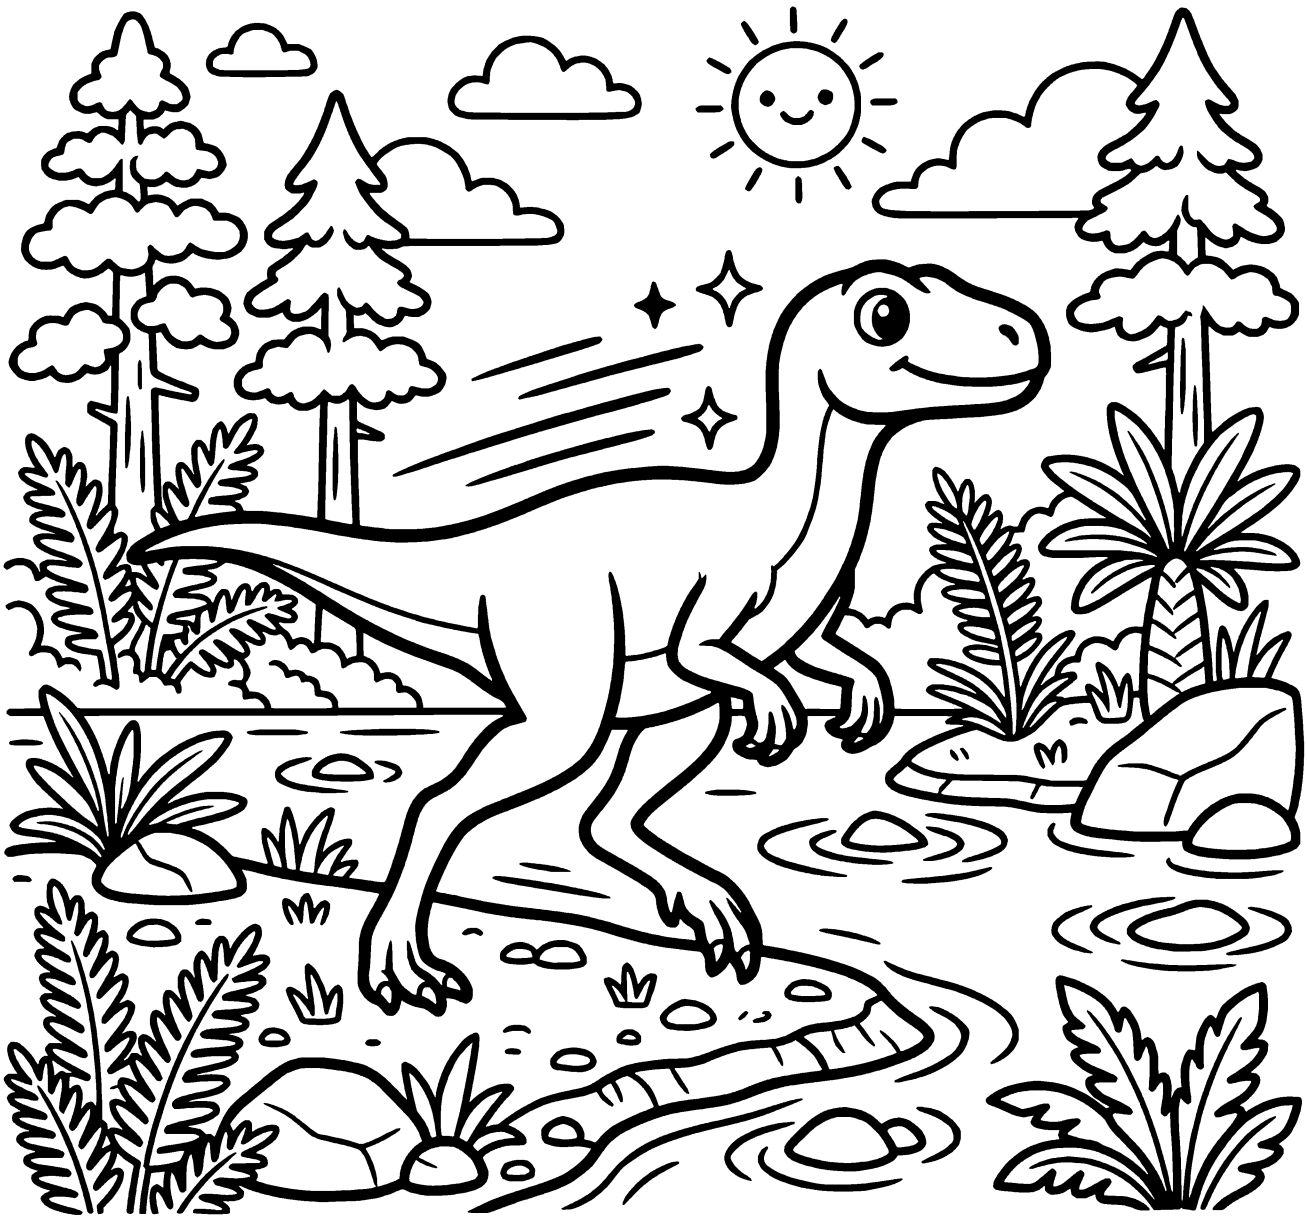

Plesiosaurus swam through the sea with four big flippers.

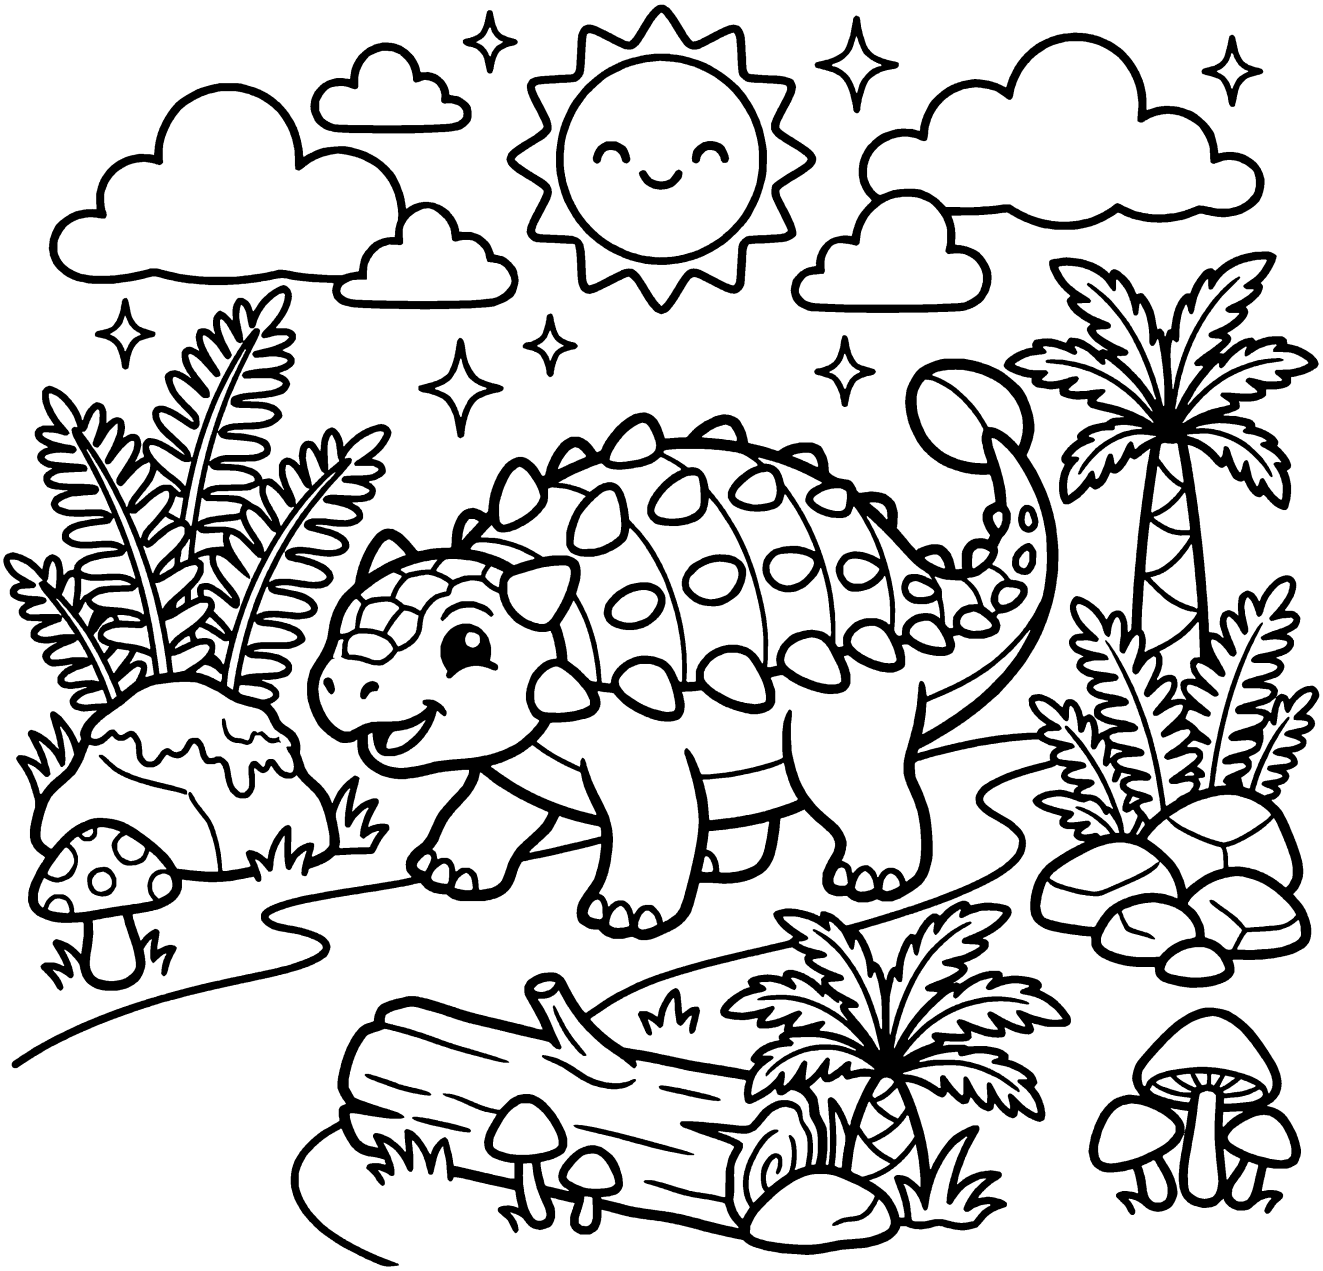

Ichthyosaurs looked a lot like dolphins, but they were reptiles.

Muttaburrasaurus was named after the town of Muttaburra in Australia.

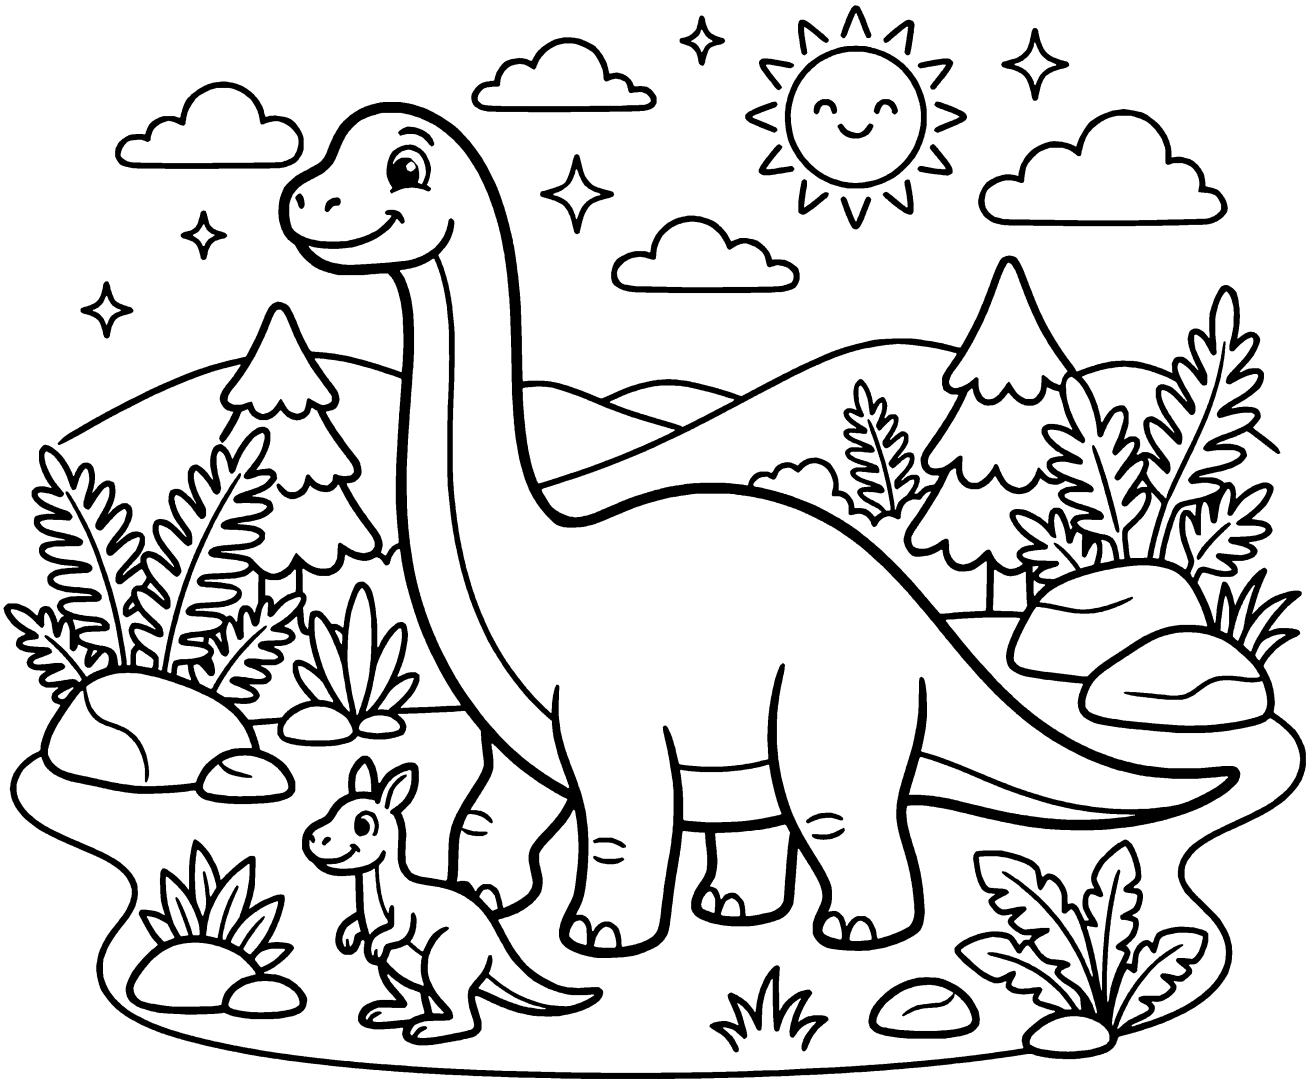

Australovenator, a speedy dinosaur from Australia, is nicknamed Banjo.

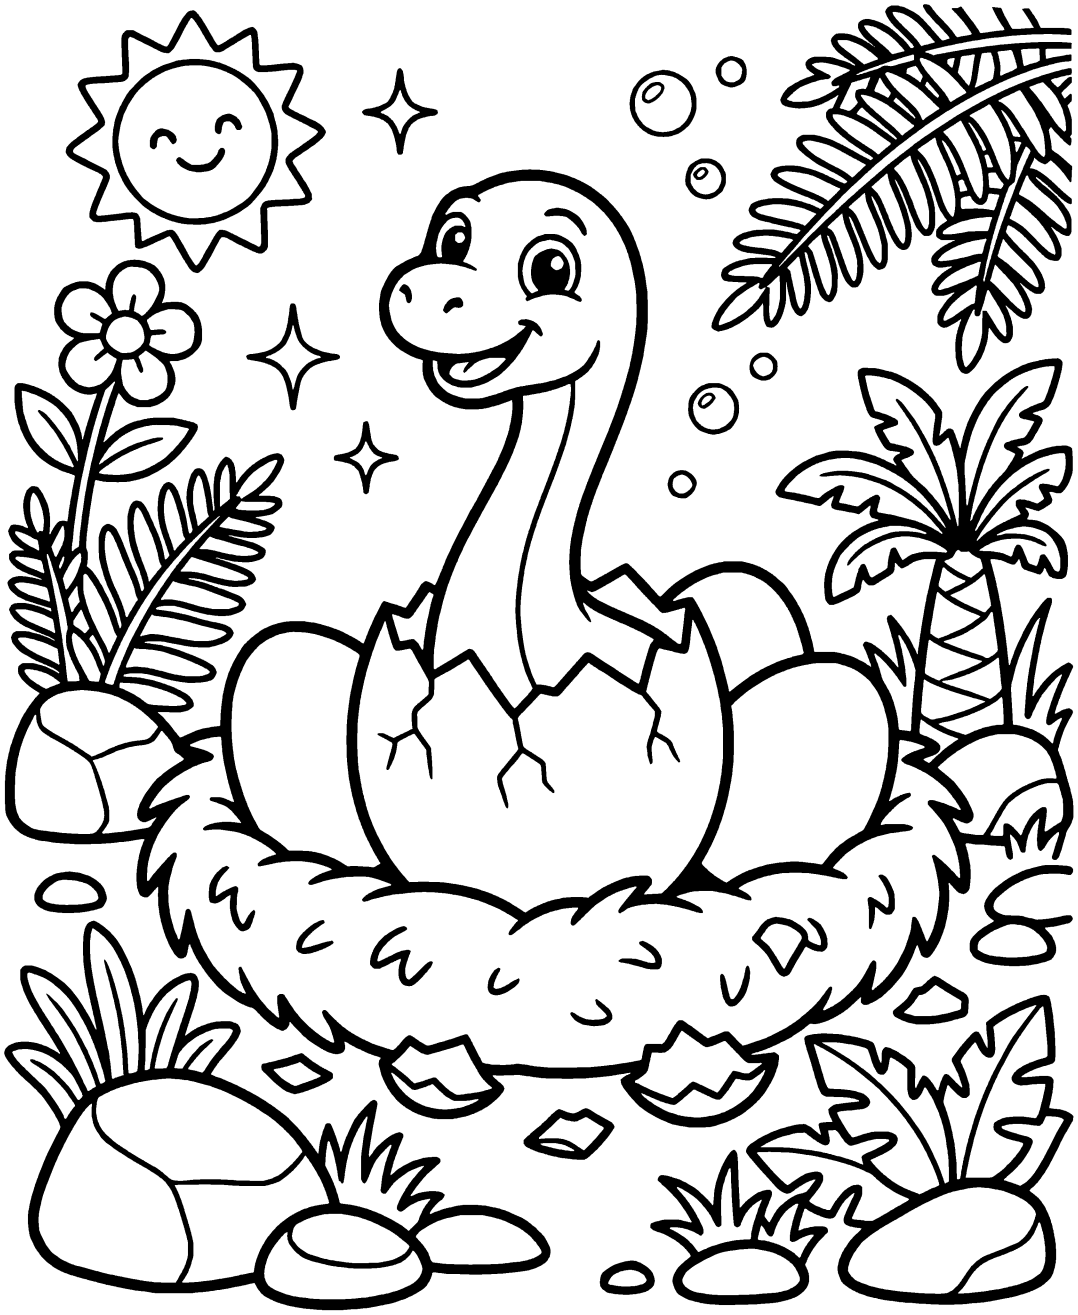

Minmi was a small Australian dinosaur with bony armor, even on its tummy.

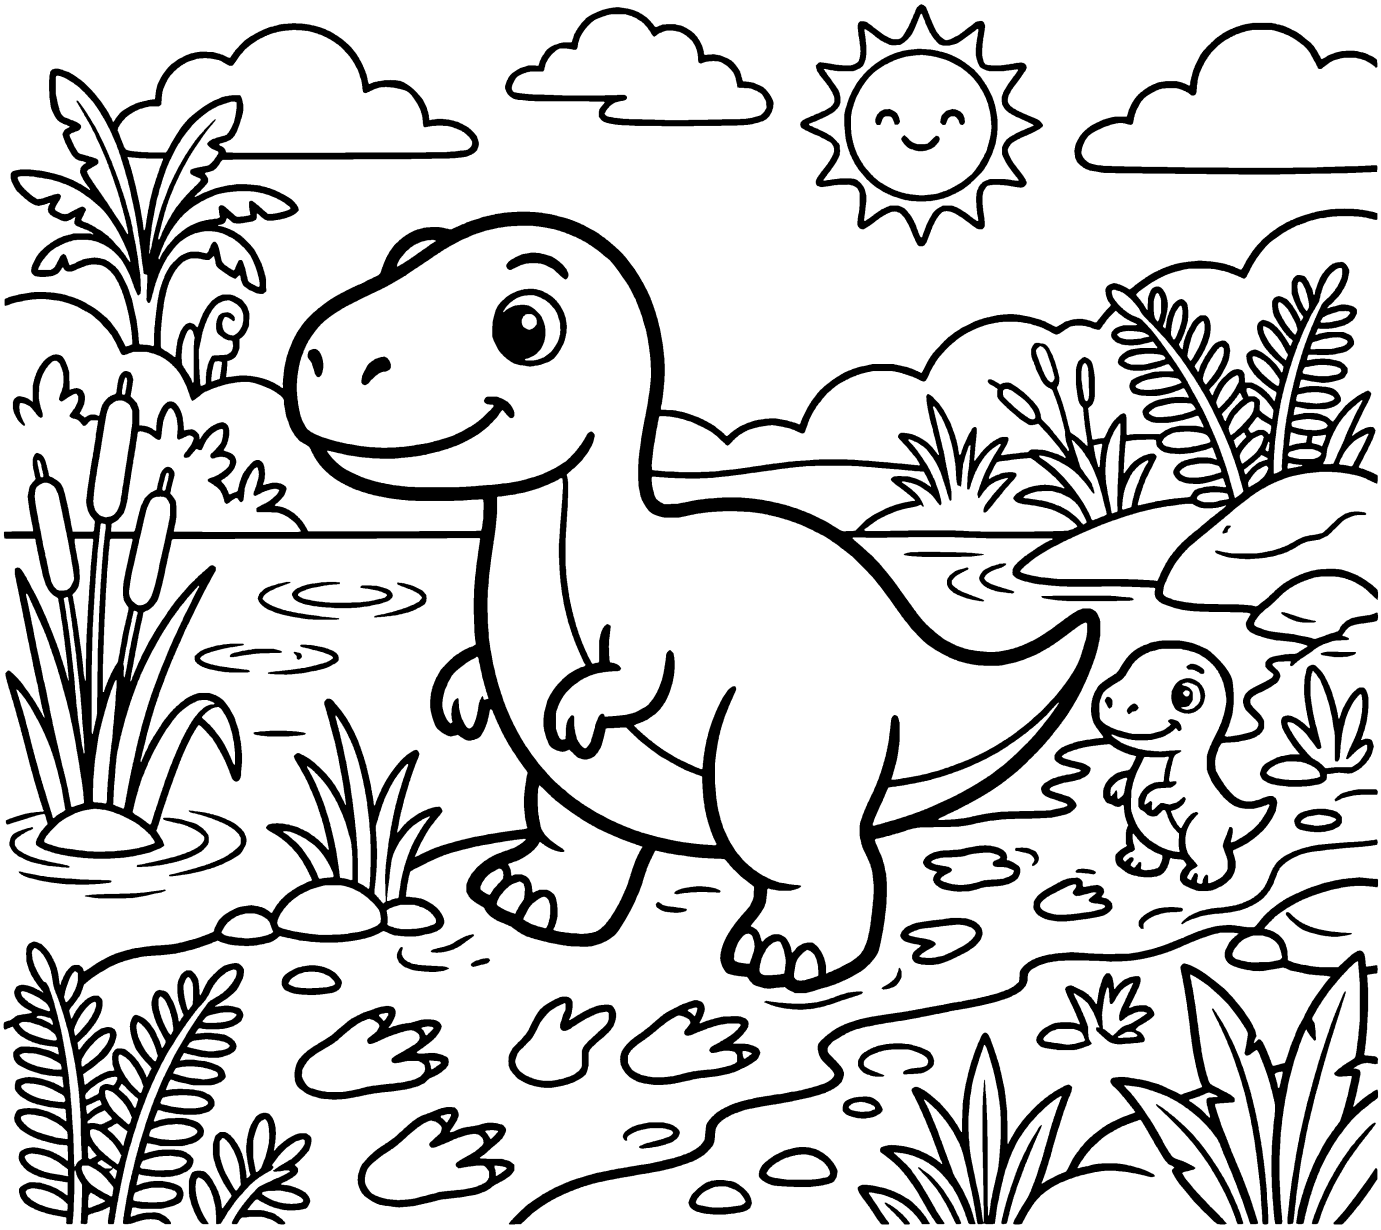

Leaellynasaura had a tail about three times as long as its body.

Australotitan is the biggest dinosaur ever found in Australia.

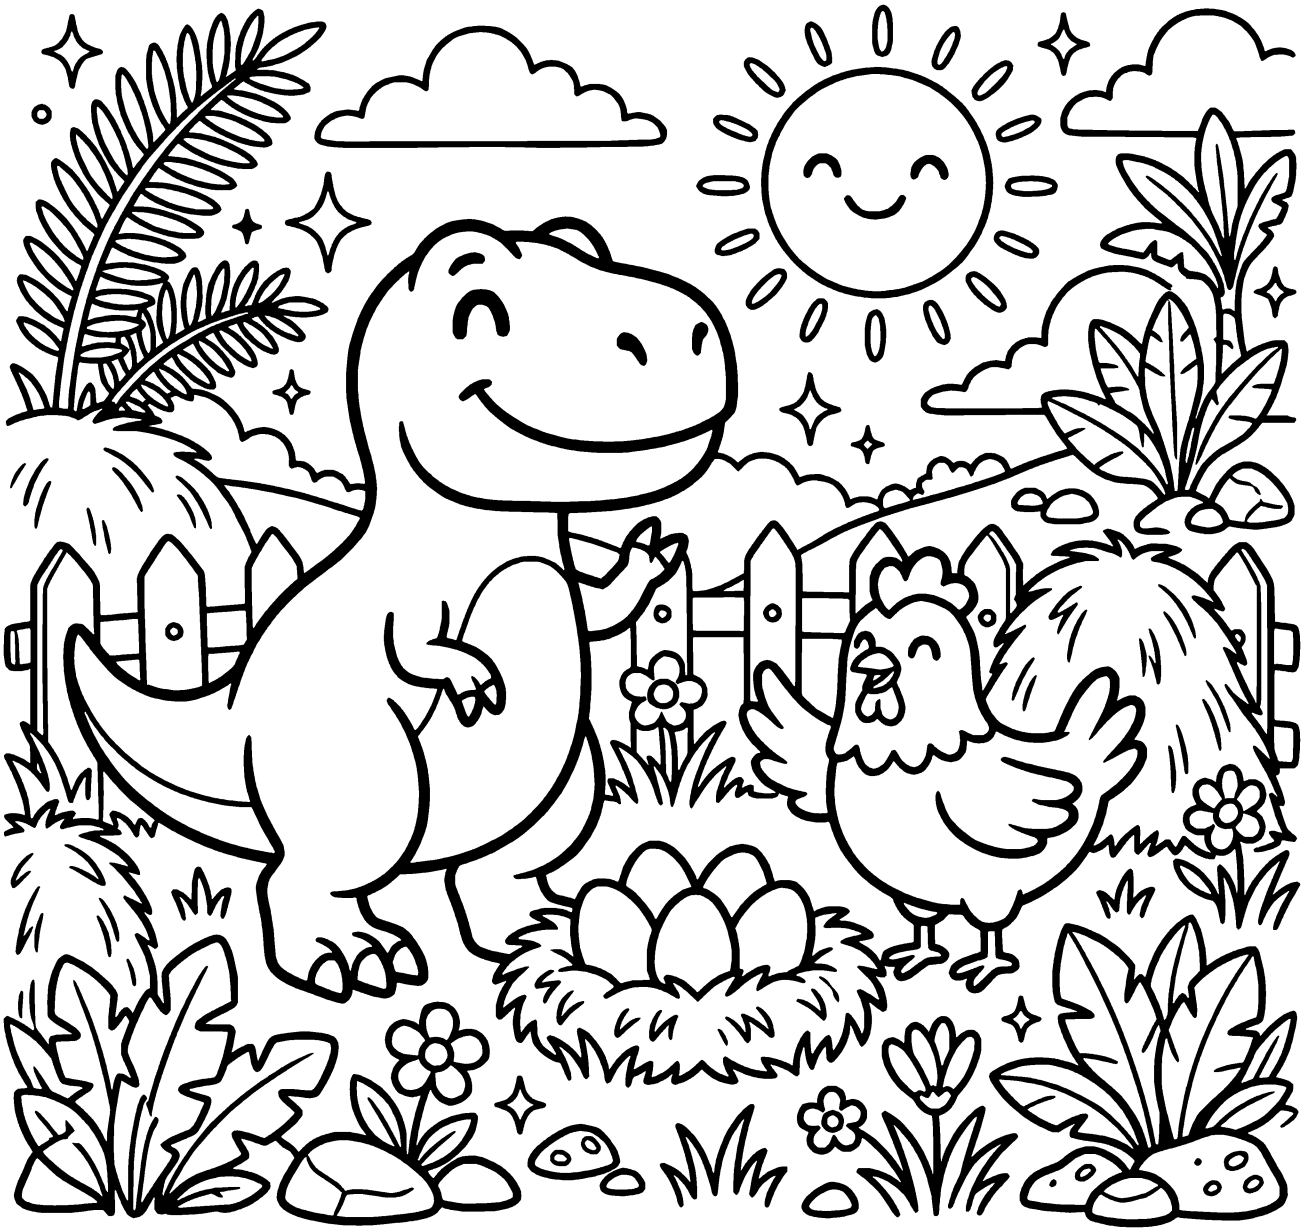

Even giant long-necked dinosaurs hatched from eggs as small as a grapefruit.

At Lark Quarry in Australia, you can see thousands of dinosaur footprints.

Scientists who dig up and study dinosaur fossils are called paleontologists.

Birds are living dinosaurs, so a chicken is a distant cousin of T. rex!

MY STOMP WONDERS CHECKLIST

Check each box as you finish coloring each page!

- ☐ 1. T. rex
- ☐ 2. Triceratops
- ☐ 3. Stegosaurus
- ☐ 4. Brachiosaurus
- ☐ 5. Velociraptor
- ☐ 6. Ankylosaurus
- ☐ 7. Spinosaurus
- ☐ 8. Parasaurolophus
- ☐ 9. Diplodocus
- ☐ 10. Pachycephalosaurus
- ☐ 11. Brontosaurus
- ☐ 12. Argentinosaurus
- ☐ 13. Mamenchisaurus
- ☐ 14. Amargasaurus
- ☐ 15. Nigersaurus
- ☐ 16. Allosaurus
- ☐ 17. Dilophosaurus
- ☐ 18. Carnotaurus
- ☐ 19. Compsognathus
- ☐ 20. Gallimimus
- ☐ 21. Troodon
- ☐ 22. Therizinosaurus
- ☐ 23. Styracosaurus
- ☐ 24. Protoceratops
- ☐ 25. Psittacosaurus
- ☐ 26. Kosmoceratops
- ☐ 27. Iguanodon
- ☐ 28. Edmontosaurus
- ☐ 29. Corythosaurus
- ☐ 30. Maiasaura
- ☐ 31. Oviraptor
- ☐ 32. Ouranosaurus
- ☐ 33. Microraptor
- ☐ 34. Sinosauropteryx
- ☐ 35. Archaeopteryx
- ☐ 36. Coelophysis
- ☐ 37. Dimetrodon
- ☐ 38. Pteranodon
- ☐ 39. Quetzalcoatlus
- ☐ 40. Plesiosaurus
- ☐ 41. Ichthyosaurus
- ☐ 42. Muttaburrasaurus
- ☐ 43. Australovenator
- ☐ 44. Minmi
- ☐ 45. Leaellynasaura
- ☐ 46. Australotitan
- ☐ 47. Dinosaur egg
- ☐ 48. Footprints
- ☐ 49. Fossil dig
- ☐ 50. Birds are dinosaurs
